PROFILO AZIENDALE

COMPANY PROFILE
PROFIL DE LA SOCIETE
PERFIL DE LA COMPANIA

KRINO è orgogliosa di poter proseguire, con il marchio LTI, una tradizione manifatturiera italiana con oltre 50 anni di esperienza. La storia del marchio ha infatti inizio il 10 Maggio 1961 a Milano, quando Giuseppe Crosa fonda l'azienda. In quel periodo l'industria meccanica italiana conosce un momento di rapida espansione e genera una crescente richiesta di accessori per le operazioni di assemblaggio. L'azienda si specializza nella produzione di inserti per l'avvitatura. LTI si mostra subito capace di fornire prodotti che uniscono, all'elevata precisione, riconosciute caratteristiche di affidabilità e ciò ne permette l'affermazione in ogni settore produttivo: dalle linee di montaggio del settore automobilistico ed elettrodomestico, all'elettronica e fabbricazione di componenti di arredamento. Nel 2011 Krino acquisisce il marchio LTI e trasferisce, nella propria sede di Monticello Brianza, l'officina di produzione con lo stesso personale qualificato, garanzia di qualità del prodotto e del servizio. La crescente richiesta di inserti sempre più performanti, conseguente alla diffusione degli utensili a batteria ad elevate prestazioni in ogni settore del mercato, fino al bricolage, impone la necessità di una continua ricerca di nuovi materiali e soluzioni tecniche in grado di soddisfare al meglio le richieste del mercato. Il nuovo catalogo 2016 LTI è il risultato dei processi innovativi messi in atto da KRINO abbinati alla garanzia di qualità del prodotto che ha da sempre contraddistinto LTI.

With the LTI brand, KRINO is proud to continue an Italian manufacturing tradition lasting more than 50 years. In fact, Giuseppe Crosa founded LTI on 10 May 1961 in Milan. In those years, the Italian mechanical industry was expanding rapidly, generating a growing demand for equipment and accessories for assembly lines. The company specialised in the production of bits for screwing applications. In no time at all, LTI proved to be capable of supplying products that combined high precision with proven reliability. This allowed it to become successful in every production sector: on the assembly lines of cars and electrical household appliances, in electronics and the manufacturing of decor and furniture items. In 2011, Krino purchased the LTI brand and its experience and moved the production centre to its headquarters in Monticello Brianza, while keeping the LTI qualified personnel as guarantee of the quality of the product and service. The growing demand for more and more efficient bits resulting from the widespread use of high-performance cordless tools in every sector of the market, as well as the increasing popularity of DIY projects, led to the constant search for new materials and technical solutions able to effectively meet the requirements of the market. In this catalogue 2016 LTI, we offer the result of our research and technical innovations.

KRINO est fiers de poursuivre avec la marque LTI, une tradition de la fabrication italienne avec plus de 50 ans d'expérience. LTI a été créée le 10 mai 1961 à Milan, lorsque Giuseppe Crosa fonda la société. Dans ces années-là, l'industrie mécanique italienne se développe rapidement et génère une demande croissante d'accessoires pour les opérations d'assemblage. L'entreprise se spécialise dans la production d'emboutspour le vissage. LTI se démontre immédiatement en mesure de fournir des produits qui allient la haute précision et les caractéristiques de fiabilité reconnues. Cela lui a permis de s'affirmer dans tous les secteurs de production : sur les chaînes de montage de l'automobile, les petits et grands électroménagers, dans l'électronique et dans la fabrication de composants électroniques. En 2011, Krino rachète la marque LTI et son expérience et transfère dans son propre siège de Monticello Brianza, l'atelier de production, tout en conservant le même personnel qualifié LTI, une garantie de qualité du produit et du service. La demande croissante d'embouts de plus en plus performants, qui dérive de la propagation des outils sans fil à hautes performances, dans tous les secteurs du marché, jusqu'au bricolage, impose la nécessité d'une recherche continue de nouveaux matériaux et de solutions techniques en mesure de satisfaire au mieux les demandes du marché. Dans ce catalogue 2016 LTI, nous offrons le fruit de nos recherches et des innovations techniques de ces dernières années.

KRINO esta orgullosa de poder seguir, con la marca LTI, una tradición manufacturera italiana con más de 50 años de experiencia. LTI nace, de hecho, el 10 de mayo del 1961 en Milán, cuando Giuseppe Crosa funda la empresa. En esos años la industria mecánica italiana se expande rápidamente y genera una creciente demanda de accesorios para las operaciones de ensamblaje. La empresa se especializa en la producción de puntas para el atornillado. LTI demuestra enseguida su capacidad de poder suministrar productos que unen a la elevada precisión unas reconocidas características de fiabilidad; esto permite su afirmación en cada sector de la producción: en las cadenas de montaje de automóviles, de los grandes y pequeños electrodomésticos, en la electrónica y en la fabricación de componentes para muebles. En 2011 Krino adquiere la marca LTI y su experiencia, desplazando a su propia sede de Monticello Brianza el taller de producción, manteniendo el mismo personal especializado LTI, garantía de calidad del producto y del servicio. La creciente demanda de puntas con cada vez más un mayor rendimiento (consecuencia de la difusión de los utensilios de batería de grandes rendimientos en cada sector del mercado), hasta el bricolaje, obliga a la empresa a buscar continuamente nuevos materiales y soluciones técnicas capaces de satisfacer lo mejor posible las exigencias del mercado. En el presente catálogo 2016 LTI ofrecemos el fruto de nuestras investigaciones e innovaciones técnicas de estos últimos años.

Una delle prime macchine profilatrici per giravite importate in Italia.
One of the first milling machines for screwdrivers imported into Italy.
L'une des premières machines à profiler pour tournevis importée en Italie.
Una de las primeras máquinas para perfiles importadas en Italia.

ESPERIENZA - Un archivio di migliaia di disegni, moltissimi casi di problem-solving sulle linee di montaggio e impianti di avvitatura automatici, la collaborazione con i produttori di utensili per avvitatura industriale e con le viterie; questo il bagaglio di conoscenze che rende il marchio LTI sinonimo di qualità ed elevata affidabilità del prodotto.

EXPERIENCE - *An archive with thousands of drawings and designs, numerous special tools made for assembly lines and automatic screwing systems, constant collaboration with tool manufacturers for industrial screwing applications, and with screw manufacturers. This wealth of knowledge makes the LTI brand synonymous with quality and high reliability.*

L'EXPÉRIENCE - *Des archives avec des milliers de dessins, de nombreux outils spéciaux réalisés pour des lignes d'assemblage et des installations de vissage automatiques, une collaboration constante avec les fabricants d'outils de vissage industriel et de visserie. C'est ce bagage de connaissances qui rend la marque LTI synonyme de qualité et de grande fiabilité du produit.*

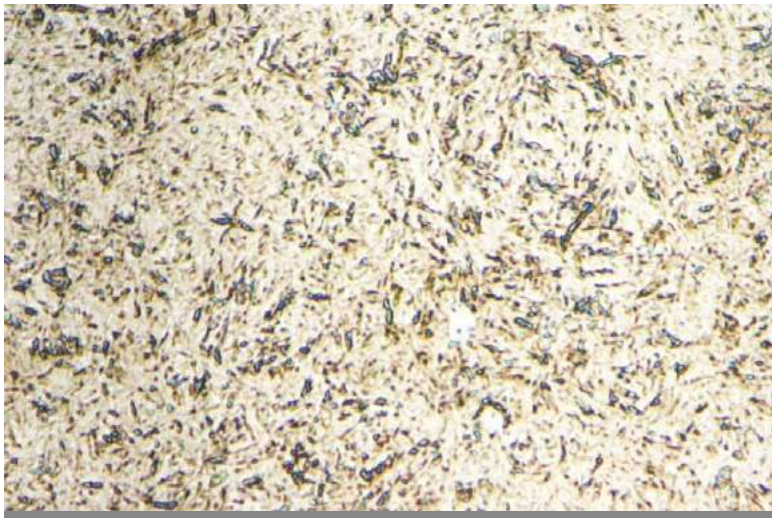

EXPERIENCIA - *un archivo con miles de dibujos, muchísimos utensilios especiales realizados para cadenas de montaje y para plantas de atornillado automáticas, colaboración constante con los productores de utensilios para el atornillado industrial y con los productores de tornillos; este es el aporte de conocimientos que hace que la marca LTI sea sinónimo de calidad y de elevada fiabilidad del producto.*

RICERCA - L'uso di avvitatori sempre più potenti, il bisogno di incrementare la produttività delle linee di montaggio, l'utilizzo di viti auto-formanti ed auto-perforanti anche su materiali estremamente duri ci spinge a cercare nuovi materiali con i quali poter ottimizzare il rapporto durezza/tenacità e nuove soluzioni produttive che possano offrire un ottimale accoppiamento tra vite ed inserto.

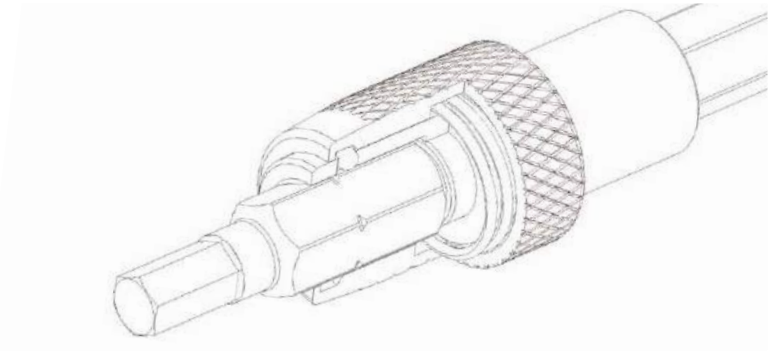

RESEARCH - *The use of more and more powerful screwdrivers, the need to increase productivity of the assembly lines, the use of self-forming and self-drilling screws even on extremely hard materials, inspires us to search for new materials that optimise the relationship between hardness and toughness and new production solutions that can offer excellent coupling between the screw and insert bit.*

LA RECHERCHE - *L'utilisation de visseuses toujours plus puissantes, la nécessité d'accroître la productivité des lignes de montage, l'utilisation de vis auto-formantes et auto-perçeuses, même sur les matériaux extrêmement durs, nous encouragent à essayer de nouveaux matériaux permettant d'optimiser le rapport dureté/ténacité et de nouvelles solutions de production qui peuvent offrir un couplage optimal entre la vis et l'embout.*

INVESTIGACIÓN - *El uso de atornilladores cada vez más potentes, la necesidad de aumentar la productividad de las cadenas de montaje, el uso de tornillos autoformantes y autotaladrantes, incluso sobre materiales extremadamente duros, nos impulsa a buscar nuevos materiales con los que poder optimizar la relación dureza/tenacidad además de buscar nuevas soluciones de producción que puedan ofrecer un acoplamiento óptimo entre el tornillo y la punta.*

Microstruttura dell'acciaio con cui vengono realizzati gli inserti.
Enlargement of the microstructure of the steel used to produce our bits.
La micro-structure de l'acier avec lequel sont réalisés les embouts.
La microestructura del acero con el que se realizan las puntas.

Progettazione e sviluppo di un portainserti con mandrino di blocco.
Developing of a block chuck bit-holder.
Etüde de un porte-embouts avec mandrin de blocage.
Estudio para un porta puntas con mandril de bloqueo.

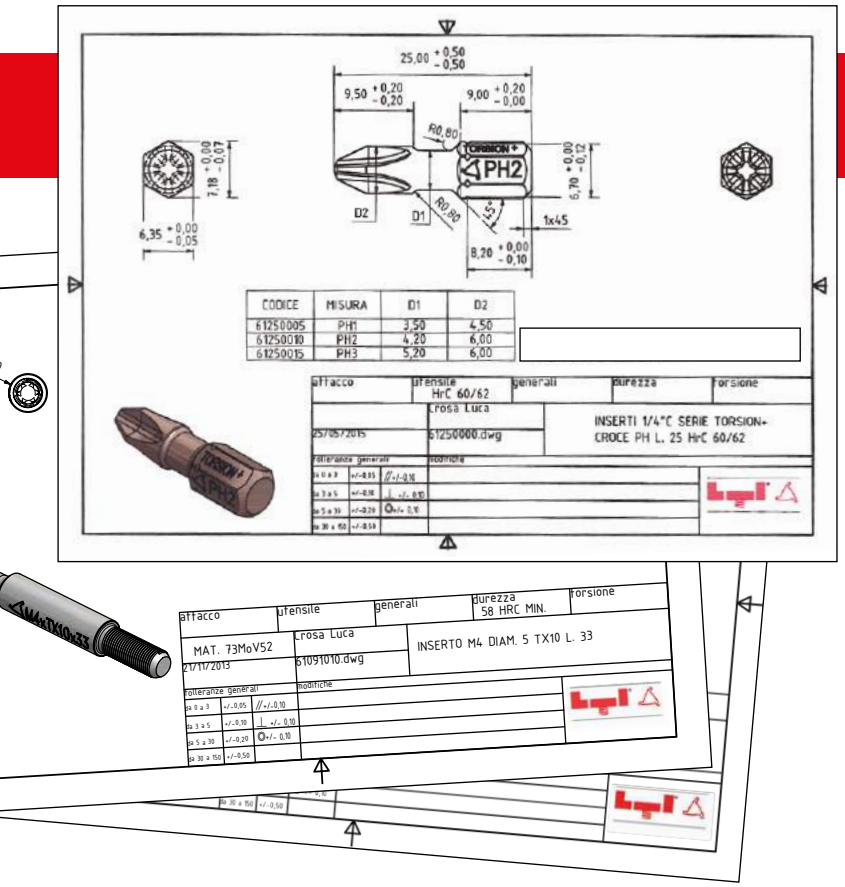

INNOVAZIONE - Su queste basi abbiamo fissato la progettazione e costruzione dei nuovi prodotti che offriamo, al mercato sia professionale che specialistico, in un'ampia varietà di materiali, proprietà tecniche, finiture e assortimenti, con un occhio di riguardo alle confezioni dedicate al punto vendita.

INNOVATION - *The design and manufacture of new products for the professional and specialist market is based on innovation. For this reason, our products are available in a wide variety of materials, technical properties, finishes and assortments with new packaging dedicated to stores.*

L'INNOVATION - *Sur ces bases, nous avons mis au point la conception et la construction de nouveaux produits que nous offrons, au marché professionnel et spécialisé, dans une grande variété de matériaux, de propriétés techniques, de finitions et d'assortiments, avec un nouveau regard aux emballages dédiés au point de vente.*

INNOVACIÓN - *Sobre estas bases hemos fijado el diseño y la fabricación de los nuevos productos que ofrecemos, ya sea al mercado profesional que al especializado, con una amplia gama de materiales, propiedades técnicas, acabados y surtido, prestando una especial atención a la forma de presentar el producto en los puntos venta.*

PROGETTAZIONE E SVILUPPO
DESIGN AND DEVELOP
LA CONCEPTION ET LE DÉVELOPPEMENT
DISEÑO Y DESARROLLO

Il nostro ufficio tecnico è in grado progettare l'utensile più indicato alle esigenze dell'utilizzatore industriale e individuare, con l'aiuto del controllo qualità, il materiale ed il trattamento termico più idonei a garantire le migliori performances. Sviluppiamo un nuovo prodotto ogni due giorni.

Our technical office is able to design the tool best suited to the needs of the industrial user, and to identify, with the help of the quality service, the material and heat treatment best suited to ensure the best performances. We develop a new product every two days.

Notre bureau technique est en mesure de concevoir l'outil le plus indiqué aux exigences de l'utilisateur industriel, localiser, avec l'aide du service qualité, le matériau et le traitement thermique les mieux adaptés pour garantir les meilleures performances. Nous développons un nouveau produit tous les deux jours.

Nuestra oficina técnica es capaz de diseñar el utensilio más indicado a las exigencias del usuario industrial, detectar, con la ayuda del servicio de calidad, el material y el tratamiento térmico más idóneos para garantizar el mejor rendimiento. Desarrollamos un nuevo producto cada dos días.

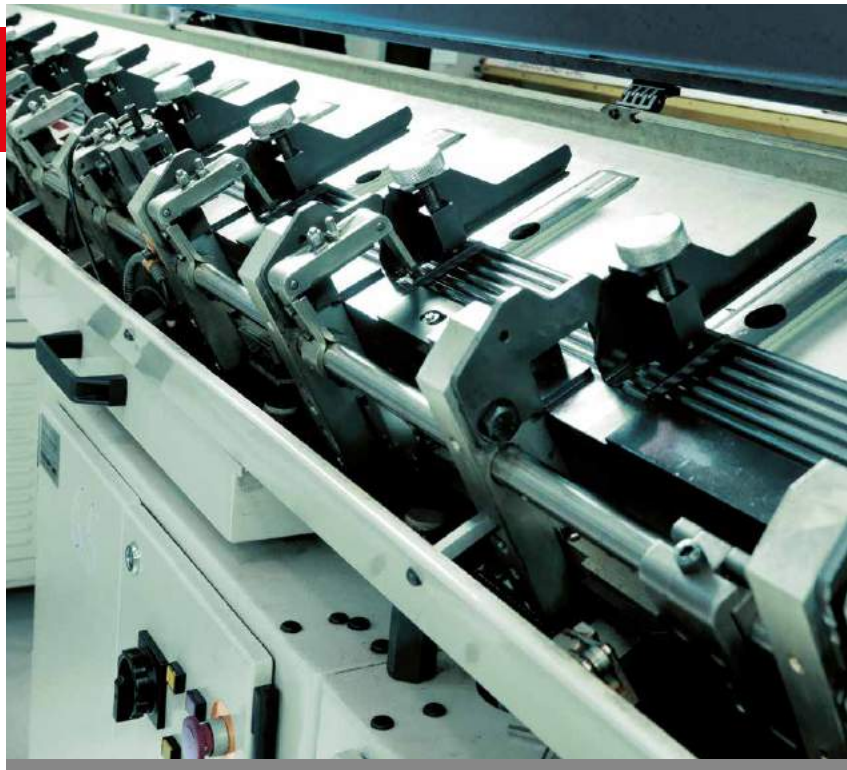

TORNITURA E PROFILATURA
TURNING AND MILLING
LE TOURNAGE ET LE PROFILAGE
TORNEADO Y PERFILADO

Torni a CNC, per operazioni di elevata precisione, con i quali possiamo lavorare barre da diametro 4mm a diametro 20mm. Profilatrici specifiche per inserti. Questo il parco macchine di cui disponiamo per soddisfare le richieste della nostra clientela.

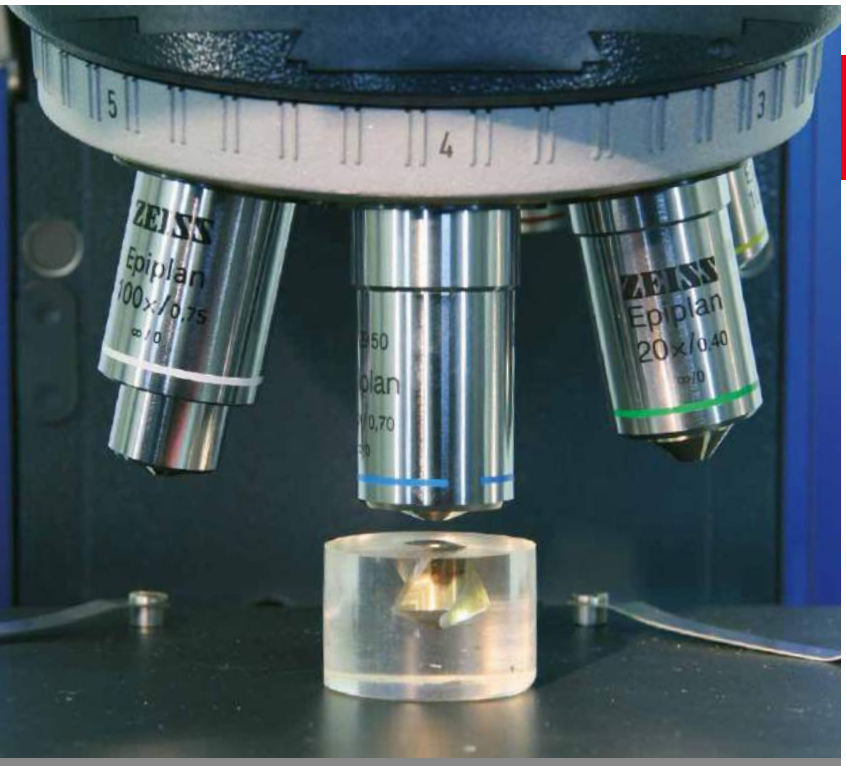

CNC lathes for high precision machining, which allows machining bars with diameters of 4mm to 20mm. Specific forming machines for bits. We have all the machinery to cater to the needs of our customers.

Tours CN pour des usinages à haute précision, avec lesquels nous pouvons travailler des barres de 4mm à 20mm de diamètre. Machines à profiler pour les embouts. C'est le parc machines dont nous disposons pour répondre aux exigences de nos clients.

Tornos de CNC para trabajos de gran precisión, con los que podemos trabajar barras de un diámetro que va de 4mm a 20mm. Máquinas para el perfilado específicas para puntas. Este es el parque de máquinas del que disponemos para satisfacer las demandas de nuestros clientes.

Caricatore automatico di barre per tornio CNC.
Automatic bar loader for CNC lathe.
Chargeur automatique de barres pour tour CN.
Cargador automático de barras para torno CNC.

Controllo microstruttura con microscopio elettronico a 1000X.
Structure quality checking by microscope 1000X.
Control de qualitè sur material avec microscope 1000X.
Control de qualidad de microstruttura con microscopio 1000X.

TEST DI QUALITÀ
QUALITY TEST
TEST DE QUALITÉ
PRUEBAS DE CALIDAD

Il modernissimo ed attrezzato laboratorio di controllo qualità garantisce l'intera produzione dei nostri utensili. Specifici ed accurati controlli metallografici sull'acciaio che acquistiamo e sul prodotto che tempriamo assicurano elevate prestazioni dei nostri utensili nella sicurezza più completa.

The ultra-modern and well-equipped control laboratory guarantees the entire production of our tools. Specific and accurate metallographic controls on the steel that we purchase and on the product that we temper, ensures high performance of our tools in the utmost safety.

Notre laboratoire de contrôle de la qualité, très moderne et bien équipé, garantit la totalité de la production de nos outils. Des contrôles métallographiques spécifiques et précis sur l'acier que nous achetons et sur le produit que nous trempons, garantissent des prestations élevées de nos outils dans la sécurité la plus complète.

El modernísimo y equipado laboratorio para el control de la calidad garantiza la entera producción de nuestros utensilios. Los específicos y meticulosos controles de metalografía sobre el acero que compramos y sobre el producto que templamos aseguran elevados rendimientos de nuestros utensilios con total seguridad.

TRATTAMENTO TERMICO
HEAT TREATMENT
LE TRAITEMENT THERMIQUE
TRATAMIENTO TÉRMICO

Siamo l'unica azienda in Italia e fra le poche in Europa a trattare internamente i propri inserti con un impianto di tempra sottovuoto. Questo tipo di tecnologia permette con assoluta certezza di evitare problemi di decarburazione ed ossidazione della superficie.

Internal heat treatment department: the only company in Italy and among the few in Europe to temper bits with a vacuum tempering plant. This type of technology prevents problems associated with oxidation and decarburisation of the surfaces.

Le service interne de traitement thermique : unique entreprise en Italie et parmi les rares en Europe à tremper ses propres embouts à l'aide d'une installation de trempe Vacuum. Cette technologie permet, avec une certitude absolue, d'éviter les problèmes de décarburation et d'oxydation de la surface.

Departamento interno para el tratamiento térmico: única empresa en Italia y una de las pocas en Europa que templa sus propias puntas con una planta de templado Vacuum. Este tipo de tecnología permite evitar problemas de descarburación y oxidación de la superficie con absoluta certeza.

Forno di tempra sottovuoto per trattamento termico.
Vacuum furnace for heat treatment.
Installation de trempe Vacuum pour traitement thermique.
Planta de templado Vacuum para tratamiento térmico.

ARTICOLI SU RICHIESTA

CUSTOME-MADE ITEMS
ARTICLES SUR DEMAND
ARTICUOLS À PEDIDO

La nostra azienda produce inserti per avvitatori secondo gli standard internazionali ma realizza anche prodotti su richiesta specifica e disegno del cliente anche per lotti di ridotta quantità. L'esperienza di cui dispongono i nostri tecnici è di supporto per la progettazione e la soluzione di ogni particolare necessità legate ad operazioni di avvitatura su impianti automatici.
Tutte le lavorazioni meccaniche ed il trattamento termico vengono eseguiti al nostro interno; per questo motivo garantiamo al nostro cliente massima flessibilità, un servizio custom fit ai massimi livelli per la realizzazione di prodotti di elevata qualità e specificità. Operiamo con successo nell'industria dei grandi elettrodomestici, delle catene di montaggio meccaniche, nei cantieri navali o aerospaziali; i nostri prodotti ogni giorno incontrano sfide importanti ed i nostri clienti riconoscono il supporto costante e qualificato che offriamo loro.

Our company manufactures bits for drills and drivers in accordance with the international standards, as well as products to fit the exact specifications and requests of customers, including small quantities. The experience and expertise of our technicians supports the design and solution of each detail of automatic screwing operations.
The machining operations and heat treatments are all performed internally; for this reason, we are able to offer customers maximum flexibility, first-rate personalised service to create high quality and specific products. We work successfully in the field of household appliances, mechanical assembly lines, shipbuilding and aircraft production. Our products face important challenges every day and our customers recognise the constant and qualified support we offer them.

Notre société fabrique des embouts pour visseuses conformément aux normes internationales, mais elle fabrique également des produits sur demande spécifique et sur dessin du client, même pour de petits lots. L'expérience de nos techniciens apporte une aide à la conception et à la solution de tout besoin particulier lié aux opérations de vissage sur des installations automatiques. Tous les usinages mécaniques et les traitements thermiques sont effectués en interne. C'est pour cette raison que nous garantissons à nos clients une polyvalence maximale, un service personnalisé au plus haut niveau pour la réalisation de produits hautement qualitatifs et spécifiques. Nous travaillons avec succès dans l'industrie des gros appareils électroménagers, des lignes d'assemblage mécaniques, dans la construction navale ou aérospatiale. Nos produits répondent aux défis quotidiens et nos clients sont satisfaits du support constant et qualifié que nous leur offrons.

Nuestra empresa produce portapuntas para atornilladores siguiendo los estándares internacionales, pero también realiza productos bajo petición específica y diseño del cliente incluso para lotes pequeños. La experiencia de la que disponen nuestros técnicos sirve como ayuda para proyectar y solucionar cualquier particular necesidad ligada a operaciones de atornillado en sistemas automáticos.
Todos los trabajos mecánicos y el tratamiento térmico son realizados por nosotros; por este motivo garantizamos a nuestro cliente la máxima flexibilidad, un servicio excelente a la medida del cliente para realizar productos específicos y de elevada calidad. Operamos con éxito en la industria de los grandes electrodomésticos, de las cadenas de montaje mecánicas, en los astilleros o en los talleres aeroespaciales. Nuestros productos cada día se enfrentan a importantes desafíos y nuestros clientes reconocen el apoyo constante y especializado que les ofrecemos.

ARTICUOLS À PEDIDO

Per raggiungere l'eccellenza nel servizio alla clientela offriamo oggi la possibilità di realizzare set e valigette con contenuti specifici: il nostro parco macchine si è infatti ampliato con una fresatrice taglia spugne che consente la realizzazione di sedi dedicate per l'inserimento di utensili e accessori su esigenza del cliente.

To achieve excellence in customer service we can offer you to create sets and cases with specific contents: our machine fleet has in fact been expanded with a sponge milling machine that allows the creation of dedicated seats for the insertion of tools and accessories on customer's request.

Pour atteindre l'excellence du service à la clientèle, nous offrons maintenant la possibilité de créer des ensembles et des boîtiers avec des contenus spécifiques: notre parc de machines a en effet été élargi avec une fraiseuse à éponger qui permet la création de sièges dédiés pour l'insertion d'outils et d'accessoires à la demande du client.

Para alcanzar la excelencia en el servicio al cliente, ahora ofrecemos la posibilidad de crear conjuntos y cajas con contenidos específicos: nuestra flota de máquinas se ha ampliado con una fresadora de esponja que permite la creación de asientos dedicados para la inserción de herramientas y accesorios a petición del cliente.

Il cliente può personalizzare il contenuto del set scegliendo gli utensili desiderati e decidendo il colore della spugna nella quale saranno disposti.

The customer can customize the contents of the set by choosing the desired tools and deciding the color of the sponge in which they will be arranged.

Le client peut personnaliser le contenu de l'ensemble en choisissant les outils souhaités et en choisissant la couleur de l'éponge dans laquelle ils seront disposés.

El cliente puede personalizar el contenido del conjunto seleccionando las herramientas deseadas y decidiendo el color de la esponja en la que se colocarán.

Nel campo dell'avvitatura, applicazioni sempre più specifiche e avvitatori a batteria sempre più potenti richiedono utensili con caratteristiche adeguate a ciascuna particolare situazione ed in grado di garantire performances sempre più elevate. Le linee PREMIUM che presentiamo in questa prima sezione, sono il frutto dell'evoluzione di questi ultimi anni di lavoro in KRINO, dove l'esperienza e la conoscenza che contraddistinguono il marchio LTI, sono state valorizzate e sviluppate dai nostri ingegneri per offrire una gamma di prodotti all'altezza delle aspettative.

Increasingly more specific applications and powerful battery-operated drivers require the use of tools with the appropriate characteristics, able to guarantee the highest performances at all times. The PREMIUM lines featured in this first section come from the evolution over the years and KRINO's constant commitment to research. Our engineers have capitalised and built on the long experience and knowledge characterising the history of LTI to offer new innovative product lines for numerous projects and applications.

Les applications toujours plus spécifiques et les visseuses sans fil toujours plus puissantes nécessitent des outils aux caractéristiques appropriées, en mesure de garantir des performances toujours plus élevées. Les lignes PREMIUM que nous présentons dans cette première partie sont le fruit de l'évolution de ces dernières années et de l'engagement continu de KRINO dans la recherche. Pendant ces années, l'expérience et la connaissance qui distinguent l'histoire de LTI, ont été valorisées par nos ingénieurs, en offrant de nouvelles lignes de produits de pointe dans la conception et les applications.

Las aplicaciones cada vez más específicas y los atornilladores de batería cada vez más potentes necesitan emplear utensilios con características adecuadas que puedan garantizar rendimientos cada vez más elevados. Las líneas PREMIUM que presentamos en esta primera sección son el resultado de la evolución de estos últimos años y de la constante inversión por parte de KRINO en la investigación técnica. Años en donde la experiencia y el conocimiento que marcan la historia de LTI han sido valorizados por nuestros ingenieros para poder ofrecer nuevas líneas de productos a la vanguardia para el diseño y las aplicaciones.

Trattenimento magnetico in quattro diversi formati e capacità per adattarsi correttamente ad ogni tipo e dimensione di vite.

Magnetic retention system in four different sizes and capacities to suit every type and size of screw.

Bague de rétention magnétique dans quatre formats différents et la capacité de s'adapter correctement pour chaque type et taille de vis.

Sistema de retención magnético en cuatro formatos diferentes y la capacidad de adaptarse adecuadamente para cada tipo y tamaño de tornillo.

Codice colore per un riconoscimento facile ed immediato sia della misura che del tipo di impronta.

COLOUR code for easy and immediate recognition of the size and profile of screw.

Code couleur pour reconnaître facilement et immédiatement mesure et type de vis.

Un código de COLOUR para el reconocimiento fácil e inmediata de la medida y el tipo de huella.

Sistema di trattenimento semplice e innovativo per risolvere molti problemi di avvitatura nel settore professionale.

Innovative simple retention system to solve many screwdriving problems in the professional sector.

Système de retenue innovante et simple pour résoudre de nombreux problèmes de fixation dans le domaine professionnel.

Sistema de retención sencilla e innovadora para resolver muchos problemas de fijación en el campo profesional.

PULSAR®

INSERTI 1/4” PER AVVITATORI A MASSA BATTENTE

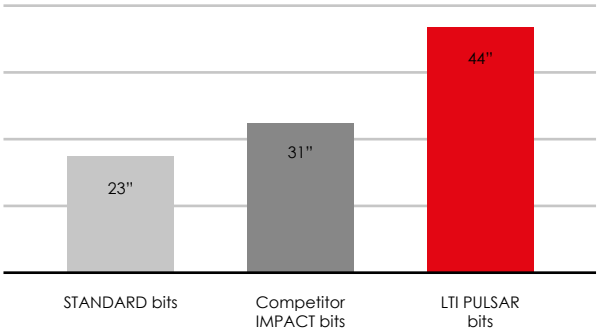

1/4” bits for impact wrenches
Embouts 1/4” pour visseuses à masse battante
Puntas de 1/4” para atornilladores de impacto

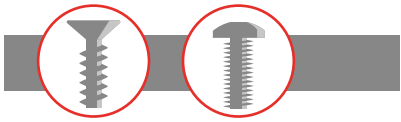

RESISTENZA AGLI IMPULSI
high pulse strenght / résistance aux impulsions / resistencia a los impulsos

ANGOLO DI TORSIONE
torsion angle / angle de torsion / angulo de torsión

Applicazioni
applications
applications
aplicaciones

Progettati e testati per l’uso con avvitatori a massa battente.

Designed and tested for use with impact wrenches.

Conçus et testés pour l'utilisation avec visseuses à masse battante.

Diseñados y probados para el uso con atornilladores de impacto.

Alta resistenza agli impulsi, anche ad elevate velocità. Sopporta le sollecitazioni fino al 300% in più di un inserto tradizionale.

High pulse strength, even at high speeds. Withstands stress up to 300% higher than traditional bits.

Haute résistance aux impulsions, même à haute vitesse. Supporte les contraintes jusqu'à 300 % de plus qu'un embout traditionnel.

Alta resistencia a los impulsos, incluso con grandes velocidades. Resiste a esfuerzos hasta el 300% de más comparado con una punta tradicional.

Profilo ridotto per ottimizzare la resistenza agli sforzi di torsione, assorbe una deformazione doppia rispetto al normale.

Reduced profile to optimise resistance to twisting, withstands twice the deformation of normal bits.

Profil réduit pour optimiser la résistance aux contraintes de torsion, qui absorbe une déformation double par rapport à la normale.

Perfil reducido para optimizar la resistencia a los esfuerzos de torsión, absorbe una deformación doble con respecto a lo normal.

   Six pans creux qui augmentent l'angle du couple en préservant l'embout de la déformation
   Hwexágono rebajado que aumenta el ángulo de par de torsión protegiendo la punta de la deformación

Appositamente studiato per lavorare con gli inserti della gamma LTI PULSAR: le esclusive geometrie costruttive fanno si che gli inserti lavorino al meglio, garantendo una durata e prestazioni straordinarie.

Designed specifically to work with the range of LTI PULSAR bits: the exclusive construction geometries optimise the work of the bits, guaranteeing durability and outstanding performances.

Conçu spécialement pour travailler avec des embouts de la gamme LTI PULSAR : les formes permettent aux embouts de travailler au mieux, en garantissant une durée et des performances exceptionnelles.

Estudiado aposta para trabajar con los puntas de la gama LTI PULSAR: las exclusivas geometrías de fabricación hacen que los puntas trabajen con el máximo rendimiento, garantizando una duración y un rendimiento extraordinarios.

FOCUS ON

AVVITATORI

WRENCHES
VISSEUSES
ATORNILLADORES

AVVITATORI IDRAULICI O AD IMPULSI
Hanno una forza di serraggio elevata ottenuta attraverso rapidissimi incrementi della pressione dell'olio. A fine serraggio viene prodotta una coppia intermittente e la tensione assiale si stabilizza. La coppia massima può essere regolata tramite la taratura della pressione dell'olio (fig. 1).

HYDRAULIC OR PULSE WRENCHES
They have a high clamping force obtained through very rapid increases in oil pressure. An intermittent torque is produced at the end of clamping and the axial tension stabilises. The maximum torque can be adjusted by setting the oil pressure (fig. 1).

VISSEUSES HYDRAULIQUES OU À IMPULSIONS
Elles ont une force de serrage élevée obtenue grâce à des augmentations rapides de la pression de l'huile. À la fin du serrage, un couple intermittent est produit et la tension axiale se stabilise. Le couple maximum peut être ajusté par le calibrage de la pression de l'huile (fig. 1).

ATORNILLADORES HIDRÁULICOS O A IMPULSOS
Tienen una fuerza de cierre muy elevada, obtenida a través de incrementos de la presión del aceite muy rápidos. Al final del cierre se produce una par de torsión intermitente y la tensión axial se estabiliza. La par de torsión máxima puede regularse a través de la calibración de la presión del aceite (fig. 1).

AVVITATORI A MASSA BATTENTE
Sviluppano un'elevatissima forza di serraggio ottenuta mediante l'impatto di due parti metalliche, chiamate incudine e martello. A differenza degli avvitatori ad impulsi, la tensione assiale continua a crescere in funzione del tempo (fig 2).

IMPACT WRENCHES
They develop a very high clamping force obtained through the impact of two metallic parts, called the anvil and hammer. Unlike pulse wrenches, the axial tension continues to grow over time (fig. 2).

VISSEUSES À MASSE BATTANTE
Elles développent une force très élevée de serrage obtenue à l'aide d'un impact de deux pièces en métal, appelées marteau et enclume. À la différence des visseuses à impulsions, la tension axiale continue de croître en fonction du temps (fig. 2).

ATORNILLADORES DE IMPACTO
Desarrollan una fuerza de cierre muy elevada que se obtiene a través del impacto entre dos partes metálicas, llamadas yunque y martillo. A diferencia de los atornilladores de impulsos, la tensión axial sigue creciendo dependiendo del tiempo (fig 2).

fig. 1

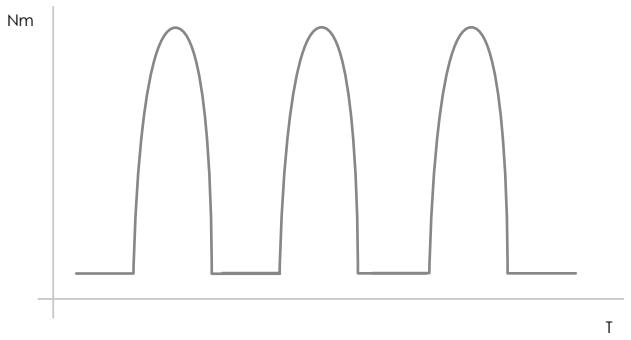

Diagramma della coppia di serraggio in un avvitatore idraulico ad impulsi.
Diagram of the tightening torque in a hydraulic pulse wrench.
Diagramme du couple de serrage dans une visseuse hydraulique à impulsions.
Diagrama de la par de torsión de cierre en un atornillador hidráulico de impulsos.

fig. 2

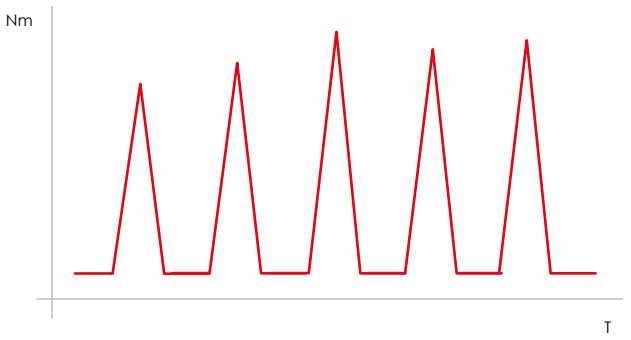

Diagramma della coppia di serraggio in un avvitatore a massa battente.
Diagram of the tightening torque in an impact wrench.
Diagramme du couple de serrage dans une visseuse à masse battante.
Diagrama de la par de torsión de cierre en un atornillador percutor.

Applicazioni
applications
applications
aplicaciones

L'esclusivo design permette di disperdere lo sforzo di torsione lungo tutto l'utensile.

The exclusive design allows distributing the torsional stress along the entire length of the tool.

Le design exclusif permet de disperser la contrainte de torsion tout au long de l'outil.

El exclusivo diseño permite distribuir el esfuerzo de torsión a lo largo de todo el utensilio.

Qualità tenace, indicata per assorbire i picchi di coppia negli avvitamenti su materiali duri.

Tough grade, suitable for absorbing torque peaks when screwing into hard materials.

Qualité tenace, indiquée pour absorber les pics de couple lors des vissages sur les matériaux durs.

Calidad tenaz, indicada para absorber los picos de par de torsión en las operaciones de atornillado sobre los metales duros.

Minimizzando i picchi si riduce l'usura, massimizzando la vita dell'utensile.

Minimisation of peaks reduces wear and maximises tool life.

La minimisation des pics permet de réduire l'usure, en maximisant la vie de l'outil.

Minimizando los picos se reduce el desgaste, maximizando la duración del utensilio.

TORSION+

INSERTI 1/4" RESISTENTI A COPPIE ELEVATE EXTRA HARD

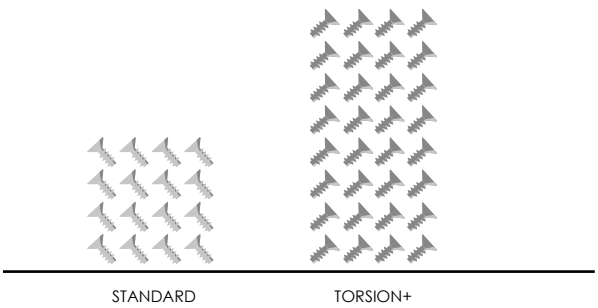

1/4" extra-hard bits torques resistant
Embouts 1/4" extra hard résistants aux couples élevés
Puntas de 1/4" extra hard resistentes a elevadas par de torsión

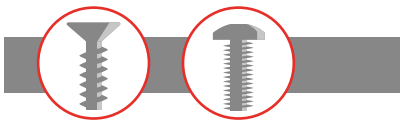

RAPPORTO DUREZZA-TENACITÀ
Hardness-toughness ratio / rapport dureté-ténacité / relación dureza-tenacidad

RESISTENZA ALL'USURA
Wear resistance / résistance à l'usure / resistencia al desgaste

Applicazioni
applications
applications
aplicaciones

Perfetto rapporto durezza/tenacità, TORSION+ raggiunge elevatissimi valori di resistenza alla torsione.

Perfect hardness/toughness ratio, TORSION+ reaches very high values of torsional stiffness.

Rapport parfait dureté/ténacité, TORSION+ atteint des valeurs très élevées de résistance à la torsion.

Perfecta relación entre dureza /tenacidad, TORSIÓN+ alcanza elevadísimos valores de resistencia a la torsión.

Ottima resistenza all'usura: la geometria dell'impronta rimane costante anche dopo moltissimi cicli di avvitatura.

Excellent wear resistance: the geometry of the tip remains constant even after numerous screwing cycles.

Excellente résistance à l'usure : la forme de l'empreinte est constante, même après plusieurs cycles de vissage.

Óptima resistencia al desgaste: la geometría de la huella permanece constante incluso después de muchísimos ciclos de atornillado.

Ideali per applicazioni intensive, anche nel settore industriale, dove l'efficienza dell'utensile deve rimanere costante per lungo tempo.

Ideal for heavy-duty applications, even in the industrial sector where tool efficiency must remain constant over a long time.

Idéales pour des applications intensives, même dans le secteur industriel, où l'efficacité de l'outil doit rester constante pendant sur longue période.

Ideal para aplicaciones intensas, incluso en el sector industrial, donde la eficiencia del utensilio tiene que permanecer constante por un largo tiempo.

HDC

INSERTI 1/4" CON RIVESTIMENTO AL DIAMANTE

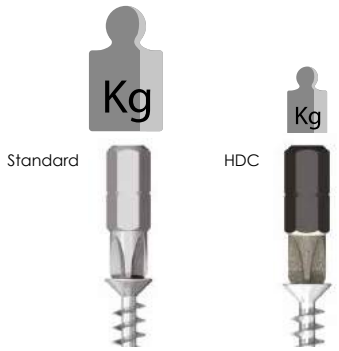

1/4" bits with diamond coating
Embouts 1/4" avec revêtement diamant
Puntas de 1/4" con recubrimiento de diamante

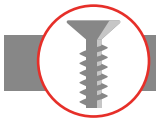

Rivestimento diamante elettrodepositato
Electro-deposited diamond coating
Revêtement diamant électrodéposé
Recubrimiento de diamante electrodepositado

RIDUZIONE DELL'EFFETTO COME-OUT
Reduced come-out effect / réduction de l'effet come-out / reducción del efecto de salida (come out)

Applicazioni
applications
applications
aplicaciones

Le minuscole particelle di diamante fanno presa nella cava della vite, si riduce l'effetto come-out, l'operatore può avvitare con meno forza e più sicurezza.

The tiny diamond particles become entrapped in the slot of the screws, reducing the come-out effect, so that the operator can screw with less force and greater safety.

Les minuscules particules de diamant font prises dans la rainure de la vis, l'effet de sortie se réduit, l'utilisateur peut visser avec moins de force et plus de sécurité.

Las minúsculas partículas de diamante se agarran dentro de la ranura del tornillo, se reduce el efecto come-out y el operador puede atornillar con menor fuerza y más seguridad.

L'inserto non scivola dalla vite, diminuisce il rischio di rovinare sia la punta dell'utensile che la testa della vite.

The bit does not slip from the screw, which reduces the risk of damaging the tool tip and screw head.

L'embout ne glisse pas de la vis, il diminue le risque d'abîmer la pointe de l'outil ainsi que la tête de la vis.

La punta no resbala del tornillo, disminuye el riesgo de estropear ya sea la punta del utensilio que la cabeza del tornillo.

L'ottimo grip che esercita questo rivestimento permette di utilizzare gli inserti HDC anche per svitare viti danneggiate o arrugginite.

The excellent grip exerted by this coating allows using HDC bits also to unscrew damaged or rusty screws.

La bonne adhérence qu'exerce ce revêtement permet d'utiliser les embouts HDC même pour dévisser des vis rouillées ou abîmées.

El óptimo agarre que proporciona este recubrimiento permite utilizar los PUNTAS HDC también para destornillar tornillos dañados u oxidados.

Rivestimento nitruro di titanio PVD - TiN
PVD titanium-nitride coating - TiN
Revêtement nitrure de titane PVD - TiN
Recubrimiento de nitruro de titanio PVD - TiN

DUREZZA SUPERFICIALE
Surface hardness / dureté de la surface / dureza superficial

Applicazioni
applications
applications
aplicaciones

Rivestimento al nitruro di titanio estremamente duro (2500 HV), ottima resistenza all'usura e all'ossidazione.

Extremely hard titanium-nitride coating (2500 HV), excellent resistance to wear and oxidation.

Revêtement au nitrure de titane extrêmement dur (2500 HV), excellente résistance à l'usure et à l'oxydation.

Recubrimiento al nitruro de titanio extremadamente duro (2500 HV), óptima resistencia al desgaste y a la oxidación.

Per avvitamenti multipli a bassi valori di coppia.

For low torque screwing jobs.

Pour des vissages multiples à petites valeurs de couple.

Para atornillados múltiplos con bajos valores de par de torsión.

Il rivestimento permette all'utensile di sopportare al meglio elevate e ripetute sollecitazioni aumentandone la vita.

The coating allows the tool to better withstand high and repeated stress, thus increasing its life.

Le revêtement permet à l'outil de supporter au mieux les sollicitations répétées et élevées en augmentant sa durée de vie.

El recubrimiento permite que el utensilio pueda soportar muy bien elevados y repetidos esfuerzos alargando du duración.

INX

INSERTI 1/4" REALIZZATI IN ACCIAIO INOX

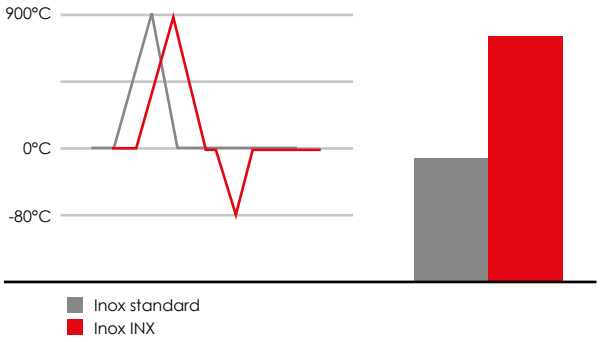

1/4" stainless steel bits
Embouts 1/4" réalisés en acier inoxydable
puntas de 1/4" fabricados con acero inoxidable

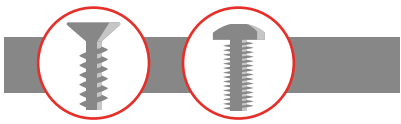

RESISTENZA ALLA CORROSIONE IN ATMOSFERA SALINA
Resistance to corrosion in saline atmospheres / résistance à la corrosion en atmosphère saline / resistencia a la corrosión en atmósfera salina

RAPPORTO RESISTENZA ALL'USURA-RINVENIMENTO CRIOGENICO
Wear resistance-cryogenic recovery ratio / rapport résistance à l'usure-revenu cryogénique / relación resistencia al desgaste-revenimiento criogénico

Applicazioni
applications
applications
aplicaciones

Interamente realizzati in acciaio inossidabile.

Made entirely of stainless steel.

Entièrement réalisées en acier inoxydable.

Completamente realizados con acero inoxidable.

Per lavori in condizioni estreme: resistono alla corrosione anche a contatto con acqua di mare.

For extreme conditions applications: corrosion resistant, even in contact with seawater.

Pour des travaux dans des conditions extrêmes : elles résistent à la corrosion même en contact avec l'eau de mer.

Para trabajos en condiciones difíciles: resistentes a la corrosión, incluso en contacto con el agua del mar.

Indicati per l'uso con viteria INOX in quanto non provocano / innescano ossidazioni.

Suitable for use with stainless steel screws as they do not cause or generate oxidation.

Indiquées pour l'utilisation avec vis INOX car elles ne provoquent pas et ne déclenchent pas d'oxydations.

Indicados para ser usados con tornillos INOX considerado que no provocan / causan oxidaciones.

FOCUS ON

Le sfere di tenuta bloccano l'inserto: questo articolo è consigliato per l'uso con inserti esagonali che tendono a bloccarsi nella cava della vite.

The sealing balls block the bit: this article is recommended for use with hexagon bits that tend to become blocked in the slot of the screw.

Les billes bloquent l'embout : cet article est recommandé lors de l'utilisation d'embouts hexagonaux qui ont tendance à se coincer dans la fente de la vis.

Las esferas de retención bloquean la punta: este artículo se aconseja para que se use con puntas hexagonales que tienden a bloquearse en la ranura del tornillo.

CORROSIONE

Gli acciai INOX sono leghe di ferro caratterizzate, oltre che dalle proprietà meccaniche tipiche degli acciai al carbonio, da una notevole resistenza alla corrosione. Tale capacità è dovuta alla presenza di elementi di lega, principalmente cromo, in grado di ricoprirsi di uno strato di ossidi aderente e invisibile che protegge il metallo sottostante dall'azione degli agenti chimici esterni (acqua, sale, altri metalli...).
I principali tipi di corrosione a cui è soggetto l'acciaio INOX sono quella in ambiente salino (corrosione salina) oppure quella dovuta a contaminazione da altri metalli (corrosione galvanica). Proprio per quest'ultimo motivo è preferibile utilizzare gli inserti INOX con viteria INOX o, se ciò non fosse possibile, interporre del materiale isolante tra gli stessi.

CORROSION

Stainless steels are iron alloys characterised not only by the typical mechanical properties of carbon steel, but also by a remarkable resistance to corrosion. This ability comes from the presence of alloy elements, primarily chromium, which are able to cover themselves with an adhering and invisible oxide layer that protects the underlying metal against the action of external chemical agents (water, salt, other metals, etc.).
STAINLESS steel is particularly prone to corrosion in saline environments (saline corrosion) or corrosion caused by contamination with other metals (galvanic corrosion).
For this last reason, it is preferable to use STAINLESS STEEL BITS with STAINLESS STEEL screws or, if this is not possible, to place insulating material between them.

CORROSION

Les aciers INOX sont des alliages en fer qui se distinguent par leurs propriétés mécaniques typiques des aciers au carbone, et offrent une résistance élevée à la corrosion. Cette capacité est due à la présence d'éléments d'alliage, du chrome principalement, en mesure de se recouvrir d'une couche d'oxydes adhérente et invisible, qui protège le métal en dessous de l'action des agents chimiques externes (eau, sel, autres métaux, etc.).
Les principaux types de corrosion auxquels est sujet l'acier INOX sont ceux en environnement salin (corrosion saline) ou ceux dus à la contamination d'autres métaux (corrosion galvanique).
C'est précisément pour cette raison qu'il est préférable d'utiliser des embouts INOX avec vis INOX ou, si cela n'est pas possible, interposer du matériau isolant entre ces dernières.

CORROSIÓN

Los aceros INOX son aleaciones de hierro que, además de tener propiedades mecánicas típicas de los aceros de carbono, se caracterizan por su elevada resistencia a la corrosión. Dicha capacidad se debe a la presencia de elementos de aleación, principalmente el cromo, capaces de cubrirse de una capa de óxidos adherente e invisible que protege al metal por debajo de la acción de los agentes químicos externos (agua, sal, otros metales…).
Los principales tipos de corrosión a los que está sometido el acero INOX son la corrosión en ambiente salino (corrosión salina) o la que se debe a la contaminación por otros metales (corrosión galvánica)
Justo por este último motivo es preferible usar los PUNTAS INOX con tornillos INOX o, si esto no fuera posible, interponer material aislante entre los mismos.

Camera per test corrosione INOX in nebbia salina.
Chamber for STAINLESS STEEL corrosion tests in a saline mist.
Chambre pour test à la corrosion INOX en brouillard salin.
Cámara para la prueba de corrosión INOX en niebla salina.

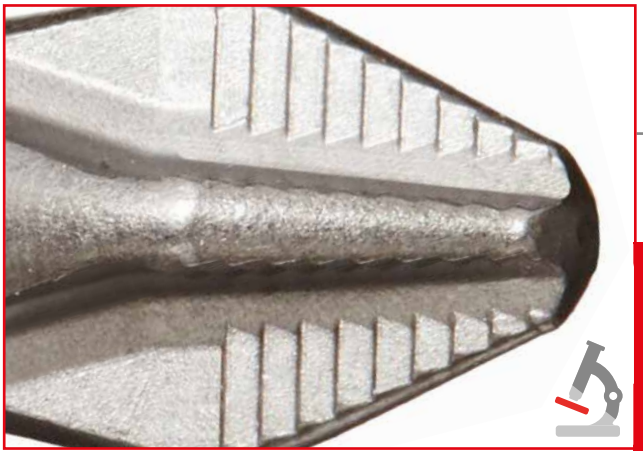

Esempio di corrosione galvanica dovuta dall'accoppiamento di dadi e bulloni in acciaio INOX su una piastra in acciaio.
Example of galvanic corrosion caused by combining stainless steel details on a steel plate.
Exemple de corrosion galvanique due au couplage d'écrous et boulons en acier INOX sur une plaque en acier.
Ejemplo de corrosión galvánica debida al acoplamiento de tuercas y pernos de acero INOX sobre una plancha de acero.

ACR®

INSERTI 1/4" CON CRESTE ANTISCIVOLAMENTO

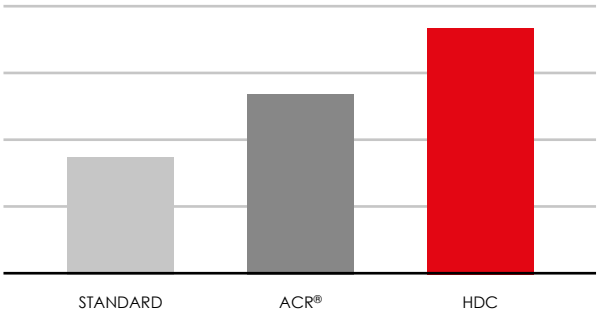

1/4" bits with Anti Come-out Ribs
Embouts 1/4" striures anti-dérapantes
Puntas 1/4" con crestas antideslizamiento

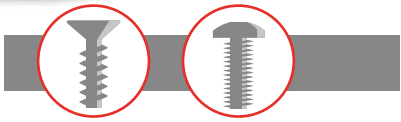

ACR® = creste antiscivolamento
ACR® = nonslip ridges
ACR® = striures antidérapantes
ACR® = crestas antideslizamiento

RIDUZIONE DELL'EFFETTO COME-OUT
Reduced come-out effect / réduction de l'effet come-out / reducción del efecto de salida (come out)

Applicazioni
applications
applications
aplicaciones

Ideali per applicazioni su materiali duri anche in presenza di ruggine: il sistema ACR® distribuisce più efficientemente la forza applicata.

Ideal for applications using hard materials, even in the presence of rust: the ACR® system distributes the force applied in a more efficient way.

Idéal pour les applications sur des matériaux durs aussi en présence de rouille : le système ACR® distribue de façon plus efficace la force appliquée.

Ideales para aplicaciones sobre materiales duros incluso con óxido: el sistema ACR® distribuye de forma más eficaz la fuerza aplicada.

Perfetta aderenza anche con viti verniciate o smaltate, tipiche del settore aeronautico.

Perfect grip even with painted or enamelled screws typically used in the aviation industry.

Parfaite adhérence avec les vis peintes ou émaillées, typiques de l'industrie aéronautique.

Perfecta adherencia incluso con tornillos barnizados o esmaltados, típicos del sector aeronáutico.

Le creste sulla punta dell'inserto aumentano l'aderenza nella cava della vite, riducendo lo scivolamento e il conseguente effetto come-out.

The ridges on the tip of the bit increase grip in the cavity of the screw, reducing slippage and consequently, the come-out effect.

Les striures sur la pointe de l'embout augmentent l'adhérence dans le creux de la vis, en réduisant le glissement et l'effet de sortie qui en dérive.

Las crestas en la punta della punta aumentan la adherencia en la ranura del tornillo, disminuyendo el deslizamiento y el consiguiente efecto come-out.

COME SCEGLIERE L'INSERTO PREMIUM

HOW TO CHOOSE THE RIGHT PREMIUM BIT
COMMENT CHOISIR L'EMBOUT PREMIUM
CÓMO ESCOGER LA PUNTA PREMIUM

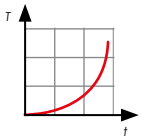

VITI AUTOFILETTANTI PER LEGNO

Self-tapping screws for wood
Vis autotaraudeuses pour bois
Tornillos de rosca chapa para madera

RECOMMENDED

p. 76

Lo sforzo cresce progressivamente fino al picco massimo quando la testa della vite penetra nel legno. In caso di legni duri questi sforzi possono essere elevati.

The stress grows progressively until reaching maximum peak when the head of the screw penetrates the wood. In case of hard wood, this stress can be very high.

La contrainte se développe progressivement jusqu'au pic maximum lorsque la tête de la vis pénètre dans le bois. Dans le cas de bois dur, ces contraintes peuvent être élevées.

El esfuerzo crece de forma progresiva hasta un punto máximo cuando la cabeza del tornillo penetra en la madera. En caso de madera dura, estos esfuerzos podrían ser muy elevados.

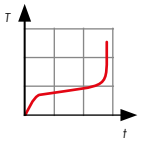

VITI AUTOFILETTANTI PER METALLO

Self-tapping screws for metal
Vis autotaraudeuses pour métal
Tornillos de rosca chapa para metal

RECOMMENDED

p. 50 p. 64

Lo sforzo, inizialmente elevato, diventa costante dopo la creazione del filetto, per poi raggiungere il picco al termine del lavoro.

The stress, initially high, becomes constant after the thread has been created, and then reaches its peak at the end of the work.

La contrainte, initialement élevée, devient constante après la création du filetage pour atteindre son pic à la fin des travaux.

El esfuerzo, inicialmente elevado, se vuelve constante después de crear la rosca, para luego alcanzar el pico al final del trabajo.

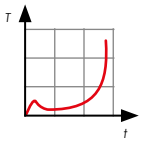

VITI AUTO-FORANTI

Self-drilling screws
Vis auto-perçeuses
Tornillos autotaladrantes

RECOMMENDED

p. 30

Nelle prime fasi si ha un picco di sforzo per la creazione di foro e filetto e le viti tendono a disallinearsi rischiando di rovonare il piano di avvitatura.

Given the particular use, when making the hole the screws tend to become misaligned and may ruin the material that is being worked.

Compte tenu de l'utilisation particulière, lors de la création du trou, les vis ont tendance à se désaligner en risquant d'abîmer le matériau travaillé.

Teniendo en cuenta el particular uso, durante la creación del orificio los tornillos tienden a desalinearse, arriesgando a estropear el material sobre el cual se está trabajando.

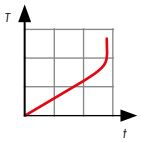

VITI TRI-LOBATE

Tri-lobe screws
Vis trilobées
Tornillos de tres lóbulos

RECOMMENDED

p. 76

Data la particolare sezione della vite lo sforzo è molto elevato durante tutte le fasi dell'avvitatura.

Given the particular section of the screw, the stress is very high throughout the entire screwing operation.

Étant donnée la section particulière de la vis, la contrainte est très élevée pendant toutes les phases de vissage.

Teniendo en cuenta la particular sección del tornillo, el esfuerzo es muy grande durante todas las fases de atornillado.

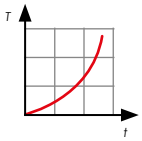

VITI LUNGHE PER COPERTURE

Long screws for roofs
Vis longues pour couvertures
Tornillos largos para coberturas

RECOMMENDED

p. 76 p. 50

Durante la fase di avvitatura nel legno lo sforzo cresce repentinamente fino a raggiungere coppie estremamente elevate.

When screwing into wood, the stress increases until reaching extremely high torques.

Pendant la phase de vissage, la contrainte augmente jusqu'à atteindre des couples extrêmement élevés.

Durante la fase de atornillado en la madera, el esfuerzo crece hasta alcanzar par de torsión extremadamente altas.

T = TORSIONE - TORQUE
t = TEMPO - TIME

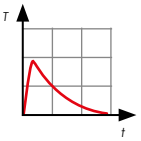

VITI VERNICIATE O DANNEGGIATE

Painted or damaged screws
Vis peintes ou endommagées
Tornillos barnizados o dañados

RECOMMENDED

p. 88 p. 124

In presenza di teste di viti arrugginite o verniciate il grip dell'inserto tende a diminuire rendendo particolarmente difficoltose le operazioni.

In the presence of rusty or painted screw heads, the grip of the insert bit tends to decrease, making it particularly difficult to perform the operations.

En présence de têtes de vis rouillées ou peintes, l'adhérence de l'embout a tendance à diminuer en rendant les opérations particulièrement difficiles.

Si hay cabezas de tornillo oxidadas o barnizadas, el agarre de la punta tenderá a disminuir dificultando el trabajo.

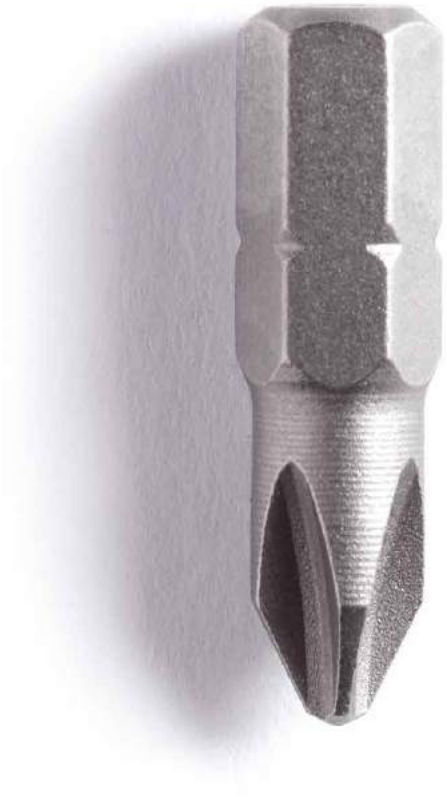

Gli inserti con attacco da 1/4" rappresentano senza dubbio la parte più significativa del mercato degli utensili per avvitatori. Ogni produttore deve quindi essere in grado di offrire ai propri clienti una gamma sufficientemente ampia di forme e di lunghezze, così da poter "risolvere il problema" in ogni occasione. Le linee di prodotti standard (ESSENTIAL) che presentiamo in questa sezione rispondono esattamente a queste necessità. Anche il confezionamento ed i metodi di presentazione sul punto vendita costituiscono un'aspetto del prodotto. Per questo motivo abbiamo sviluppato nuove e diversificate soluzioni espositive, che vanno dal bit-set più semplice all'espositore più completo.

Insert with 1/4" attachment account for the largest slice of the market of tools for drivers. As a manufacturer, we are able to offer our customers a wide range of shapes and lengths, so that they can be the ideal choice for any application. The standard or ESSENTIAL product lines presented in this section perfectly meet these requirements. The packaging and presentation of the products in the store is also an important aspect and we have worked hard to develop a complete range of counter displays, which include innovative pocket-sized bit sets with a brand new design.

Les embouts avec queue 1/4" représentent la partie la plus importante du marché des outils pour visseuses. En tant que producteur, nous sommes donc en mesure d'offrir à nos clients un large éventail de formes et de longueurs, afin de proposer un choix idéal pour toute application. Les lignes de produits standard ou ESSENTIAL, que nous présentons dans cette section correspondent exactement à ce type de caractéristiques. Même l'emballage et la présentation du produit dans le point de vente constituent un aspect important auquel nous avons consacré beaucoup d'énergie, en développant des solutions d'exposition sur comptoir complètes, ainsi que des jeux d'embouts de poche, au nouveau design.

Las puntas con empalmes de 1/4" representan la parte más significativa del mercado de los utensilios para atornilladores. Como productores podemos ofrecer a nuestros clientes una gama tan amplia de formas y longitudes hasta el punto de convertirnos en la elección ideal para cualquier aplicación. Las líneas de los productos estándar o ESSENTIAL que presentamos en esta sección confirman exactamente esta característica. También la presentación y el embalaje en el punto venta del producto constituyen un aspecto importante al cual hemos dedicado mucha energía, desarrollando soluciones de exposición para mostradores completas, así como innovadores juegos de puntas de bolsillo con el nuevo diseño.

Lavorazioni meccaniche eseguite con moderne macchine a CN di elevata affidabilità per conferire alle geometrie dell'inserto la precisione necessaria al miglior accoppiamento con la vite.

Mechanical processes performed with modern CNC machines to give the geometries of the bit the precision necessary for better screw coupling.

Usinages mécaniques effectués avec des machines modernes à CN pour conférer aux formes de l'embout la précision nécessaire au meilleur accouplement avec la vis.

Trabajos mecánicos realizados con modernas máquinas con CN (Control Numérico) para dar a las geometrías de la punta la precisión necesaria para acoplarse mejor con el tornillo.

Acciaio di altà qualità al Cromo-Molibdeno-Vanadio temprato a cuore. Temperatura di rinvenimento calibrata per dare ad ogni tipologia la durezza ottimale.

High-quality chrome-molybdenum-vanadium hardened steel and recovery temperature calibrated to strengthen each insert bit to its maximum hardness.

Acier haute qualité au chrome-molybdène-vanadium trempé à cœur et température de revenu calibrée pour donner à chaque type d'embout une dureté optimale.

Acero de alta calidad de Cromo-Molibdeno-Vanadio templado incluyendo su núcleo y con temperatura de revenimiento calibrada para dar a cada tipología de punta la mejor dureza.

La fosfatazione allo zinco come rivestimento superficiale conferisce a questa linea di prodotto un'ottima resistenza all'ossidazione.

Zinc phosphate as a surface coating offers this product line excellent oxidation resistance.

La phosphatation au zinc du revêtement de surface confère à cette ligne de produit une excellente résistance à l'oxydation.

El fosfatado de zinc como recubrimiento superficial proporciona a esta línea de productos una óptima resistencia a la oxidación.

Controlli qualitativi e attenzione al customer satisfaction permettono di mantenere la qualità dei nostri prodotti sempre ai massimi livelli.

Strict quality controls and constant attention to customer satisfaction ensure that the quality of our products is always at the highest levels.

Des contrôles qualité extrêmement précis et une attention constante à la satisfaction du client permettent de maintenir la qualité de nos produits toujours au plus haut niveau.

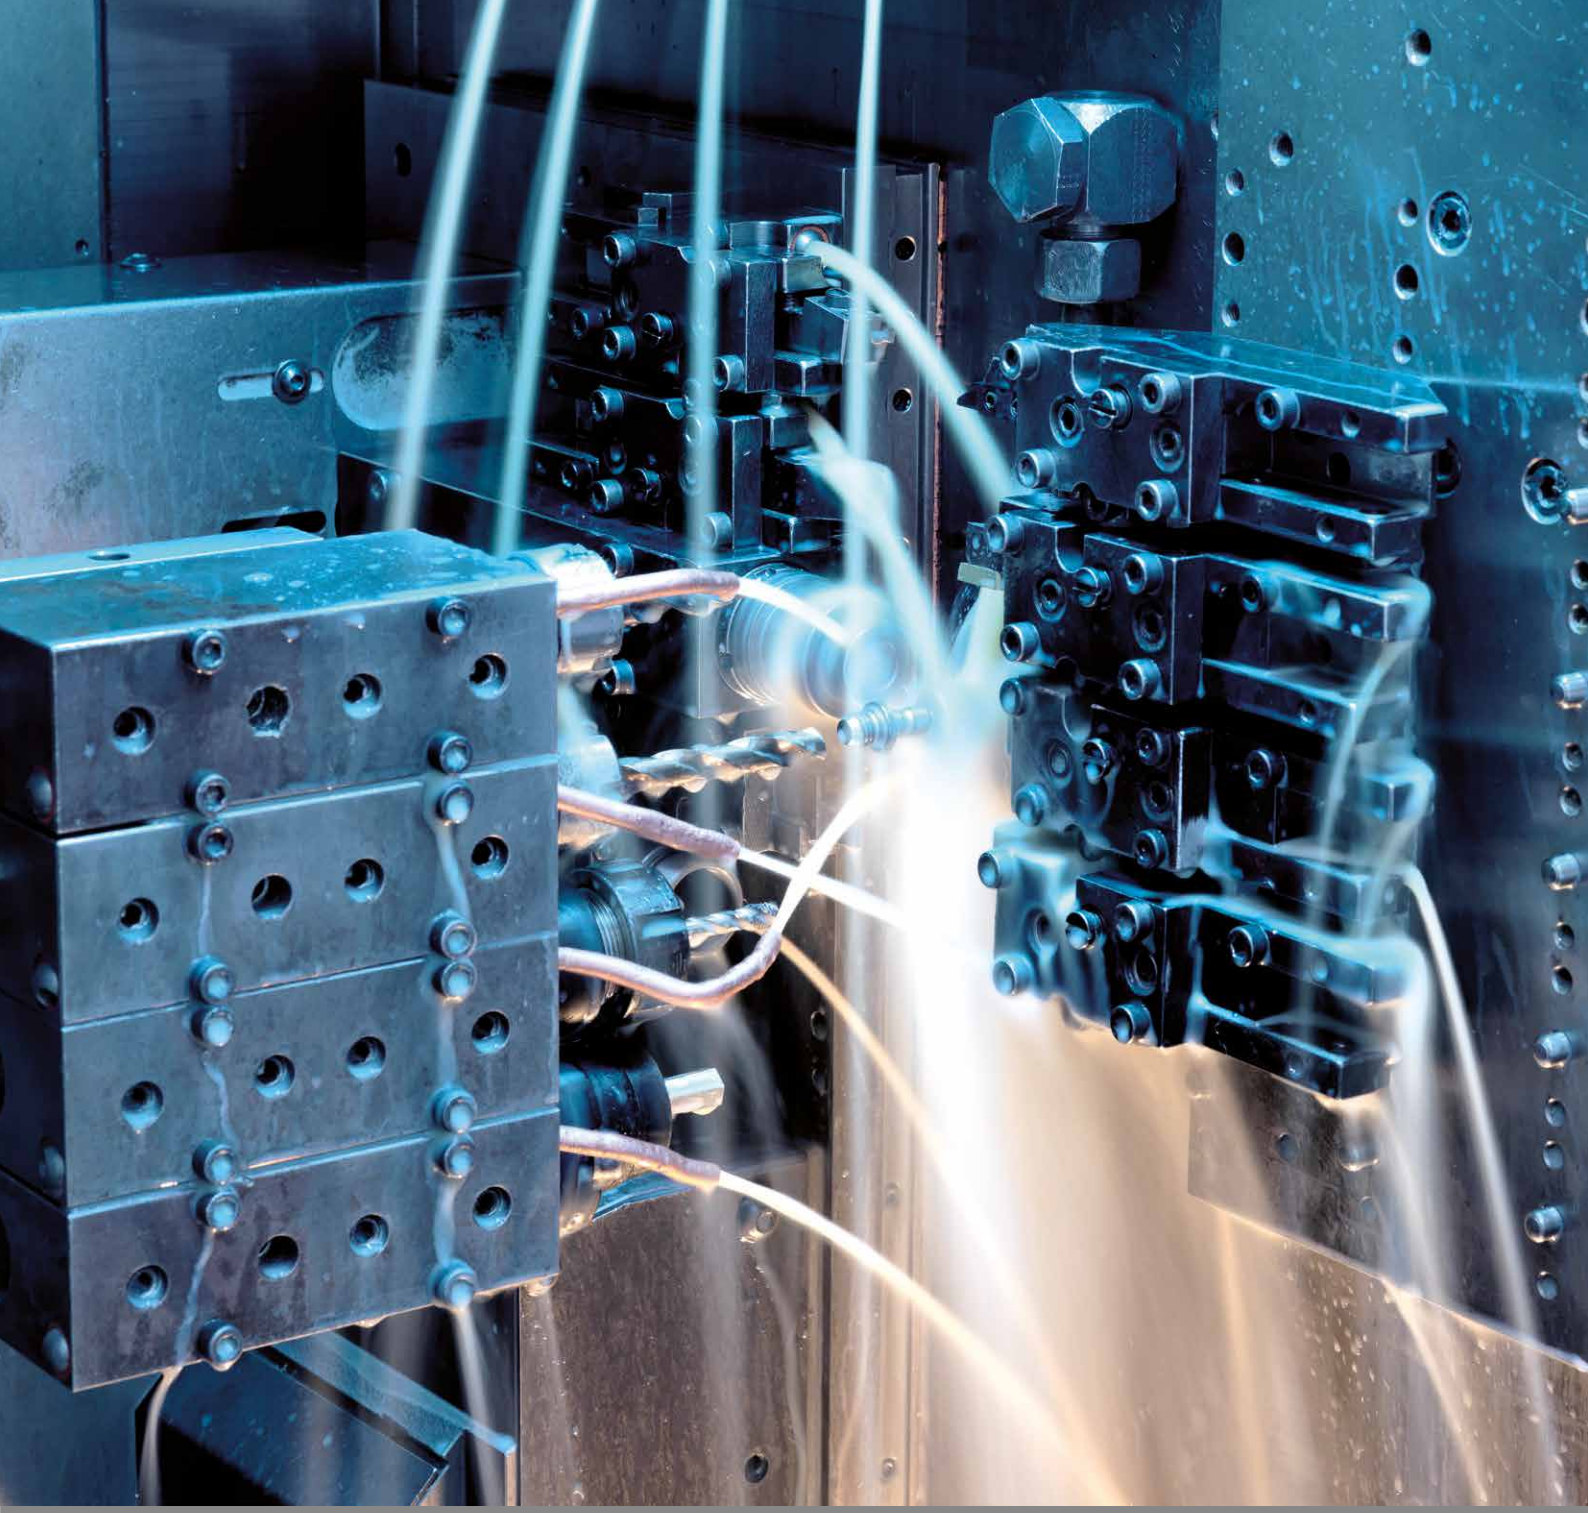

Los estrictos controles de la calidad y una atención constante para satisfacer las necesidades del cliente permiten mantener la calidad de nuestros productos siempre al máximo.

Grazie all'ottimo equilibrio tra durezza e tenacità, i nostri inserti ESSENTIAL non presentano rischi di rotture precoci e pericolose.

The perfect balance between hardness and toughness of our ESSENTIAL bits, prevent premature and dangerous breakage.

Grâce à l'excellent équilibre entre la dureté et la ténacité, nos embouts ESSENTIAL ne présentent pas de risque de ruptures prématurées et dangereuses.

Gracias al óptimo equilibrio entre dureza y tenacidad, nuestras puntas ESSENTIAL no corren el riesgo de sufrir rupturas precoces y peligrosas.

Particolare di una nostra macchina utensile: tornio CN a 10 assi ad alta precisione.
One of our machine tools: CN lathe with 10 high-precision axes.
Détail de notre machine outil : tour CN à 10 axes à haute précision.
Detalle de una máquina utensilio nuestra: torno CN de 10 ejes de alta precisión.

FOCUS ON

La fresatura, o più correttamente profilatura, è la lavorazione per asportazione di truciolo che viene eseguita per realizzare l'impronta dell'inserto. Noi la eseguiamo con apposite macchine costruite in Germania ed utensili per fresatura specifici per ogni misura di impronta. La profilatura, unitamente all'operazione di tornitura, riescono a garantire alle geometrie dell'inserto una precisione superiore rispetto al metodo di stampatura a freddo.

Milling, or more correctly, profiling, is the chip removal process which is performed to create the tip of the insert bit. We perform this with special milling machines and tools specific to each tip size. Profiling, together with the turning operation, gives the bit greater geometric precision than cold pressing.

Le fraisage, ou plus correctement le profilage, est l'usinage par enlèvement de copeaux qui est effectué pour réaliser l'empreinte de l'embout. Nous l'effectuons avec des machines spéciales et des outils de fraisage spécifiques à chaque mesure d'empreinte. Le profilage et l'opération de tournage sont en mesure de garantir aux formes de l'embout une précision supérieure par rapport à la méthode de pressage à froid.

El fresado, o con más precisión, el perfilado, es el trabajo de eliminación de la viruta que se realiza para formar la huella de la punta. Nosotros la realizamos con máquinas y utensilios idóneos para el fresado específicos para cada medida de huella. El perfilado, junto a la operación de torneado, consiguen garantizar a las geometrías de la punta una precisión superior con respecto al método de moldeado en frío.

FOCUS ON

Questi inserti sono specifici per utilizzi dove non siano applicate elevate coppie di serraggio: su legni teneri o lamiera. L'elevata durezza preserva l'integrità dell'impronta e aumenta l'efficienza dell'utensile.

These bits are specifically for applications that do not require the use of high torques: on soft wood or sheet metal. The extra hardness preserves the integrity of the tip and increases tool efficiency.

Ces embouts sont spécifiques pour les utilisations où sont appliqués des couples élevés de serrage : sur des bois tendres ou des tôles. La dureté élevée préserve l'intégrité de l'empreinte et augmente l'efficacité de l'outil.

Estas puntas son específicos para usos donde no se apliquen elevados pares de torsión de cierre: sobre madera tierna o chapa. La elevada dureza preserva la integridad de la huella y aumenta la eficiencia del utensilio.

FOCUS ON

La bussola copre la testa della vite: in questo modo si evita di penetrare eccessivamente nel cartongesso facilitando così le operazioni di stuccatura.

The socket covers the head of the screw: this prevents excessive penetration into plasterboard, thus facilitating the grouting operations.

La douille couvre la tête de la vis : cela évite de trop pénétrer dans la plaque de plâtre en facilitant ainsi les opérations de jointoiement.

El vaso cubre la cabeza del tornillo: de esta manera se evita tener que penetrar excesivamente en el pladur facilitando la operación de estucado.

TIPS

Il corpo pieno interamente esagonale permette di applicare la massima torsione.

The full hexagonal body allows applying the maximum torque.

Le corps plein hexagonal permet d'appliquer une torsion maximale.

El cuerpo entero internamente hexagonal permite aplicar la máxima torsión.

FOCUS ON

Le viti con impronta THX antimanomissione sono spesso utilizzate per l'assemblaggio di piccoli elettrodomestici per escludere rischi di manomissione da personale non qualificato.

Screws with tamper-proof THX tip are often used in the assembly of small household appliances to eliminate the risk of tampering by unqualified people.

Les vis inviolables avec empreinte THX sont souvent utilisées pour l'assemblage de petits appareils électroménagers, afin d'exclure les risques de manipulation par un personnel non qualifié.

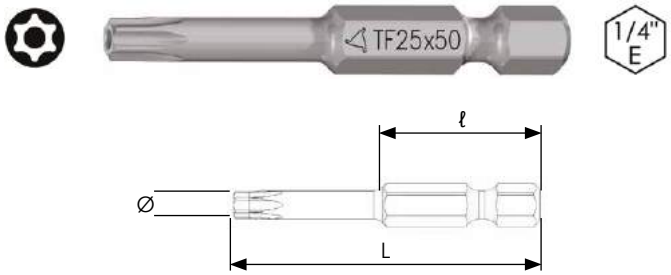

Los tornillos con huella THX anti manipulación se usan a menudo para el ensamblaje de pequeños electrodomésticos con el fin de evitar el riesgo de que sean manipulados por personal no especializado.

FOCUS ON

L'impronta TX conica raggiunge il massimo della tolleranza dimensionale.
- Tutto il profilo dell'inserto aderisce alla cava della vite (mentre la standard è sempre leggermente lasca), trasmette più uniformemente la coppia di serraggio e si consuma meno.
- L'inserto rimane in asse con la vite rendendo più veloce e sicura l'avvitatura.

The tapered TX tip reaches the maximum dimensional tolerance.
- The entire profile of the insert sticks to the cavity of the screw, while the standard is always slightly loose, spreading the tightening torque more evenly and contributing significantly to less wear and tear.
- The bit remains in axis with the screw for faster and safer screwing.

L'empreinte TX conique atteint le maximum de la tolérance dimensionnelle.
- Tout le profil de l'embout adhère à la fente de la vis, alors que le modèle standard est légèrement lâche, en transmettant de façon uniforme le couple de serrage et en contribuant de manière significative à la réduction de l'usure.
- L'embout reste dans l'axe avec la vis, en rendant le vissage plus rapide et sûr.

La huella TX cónica alcanza el máximo de la tolerancia dimensional.
- Todo el perfil de la punta se adhiere a la ranura del tornillo, mientras que la estándar está siempre ligeramente floja, transmitiendo de forma más uniforme la par de torsión de cierre y contribuyendo sensiblemente a un menor desgaste.
- La punta queda alineada con el tornillo haciendo que sea más rápido y seguro el atornillado.

FOCUS ON

Le viti TORX-PLUS® IPR trovano vasta applicazione nel campo degli assemblaggi meccanici. La loro particolare forma garantisce un'inviolabilità quasi assoluta.

TORX-PLUS® IP screws come from the evolution of the traditional TORX® tip to ensure high resistance to torsional stress. This type of tip is used in the mechanical field and to clamp turning tools.

Les vis TORX-PLUS® IP sont une évolution de l'empreinte TORX® traditionnelle pour fournir une résistance élevée au couple de torsion. Ce type d'empreinte est utilisé dans la mécanique et pour le serrage d'outils de tournage.

Los tornillos TORX-PLUS® IP nacen como evolución de la huella TORX® tradicional para garantizar una gran resistencia a la par de torsión. Este tipo de huella se utiliza en el campo mecánico para el cierre de los utensilios para el torno.

FOCUS ON

Queste bussole evitano che la vite a taglio scappi dalla lama durante l'avvitatura e sono appositamente disegnate per essere utilizzate con inserti COD. 61022 e portainserti COD. 62012 o COD. 62014.

These sockets prevent the slotted screw from coming out of the blade during screwing. They are specifically designed to be used with bits, code 61022 and bit holders, code 62012 or code 62014.

Ces douilles empêchent que la vis à fente s'échappe de la lame pendant le vissage. Elles sont spécialement conçues pour être utilisées avec des embouts COD. 61022 et porte-embouts COD. 62012 ou COD. 62014.

Estos vasos evitan que el tornillo de corte se escape de la lama durante la operación de atornillado y han sido diseñadas aposta para ser usadas con puntas COD. 61022 y porta puntas COD. 62012 o COD. 62014.

FOCUS ON

PHILLIPS®

PHILLIPS® è un marchio registrato di PHILLIPS SCREW COMPANY, fondata da Hensy F. Phillips nel 1934 e cominciò ad essere largamente utilizzata nel 1940 dalla General Motors per l'assemblaggio delle Cadillac. La sua caratteristia principale sta nell'essere autocentrante, è quindi particolarmente indicata negli assemblaggi industriali su linee automatizzate.

PHILLIPS® is a registered trademark of PHILLIPS SCREW COMPANY, which was founded by Henry F. Phillips in 1934. The Phillips screw began to be widely used in 1940 by General Motors for the assembly of the Cadillac. Its self-centring feature makes it particularly suitable for automatic assembly lines.

PHILLIPS® est une marque déposée de PHILLIPS SCREW COMPANY, fondée par Henry F. Phillips en 1934 et a commencé à être largement utilisée en 1940 par General Motors pour l'assemblage des Cadillacs. Sa principale caractéristique est d'être auto-centreuse. Elle est donc particulièrement adaptée au montage sur des lignes automatisées.

PHILLIPS® es una marca registrada de PHILLIPS SCREW COMPANY, fundada por Hensy F. Phillips en 1934 y empezó a ser muy usada en 1940 por General Motors para el ensamblaje de los Cadillac. Su característica principal es su centrado automático; por lo tanto es particularmente indicado en los ensamblajes industriales sobre líneas automatizadas.

POZIDRIV®

POZIDRIV® è un marchio registrato di PHILLIPS SCREW COMPANY e venne sviluppato agli inizi degli anni '60. Si differenza dall'impronta PHILLIPS® per avere una doppia serie di creste a croce; le creste principali hanno spessore costante che evita l'effetto di Come-Out. POZIDRIV® trova maggior impiego nel settore del legno.

POZIDRIV® is a registered trademark of PHILLIPS SCREW COMPANY and was developed in the early sixties. Unlike the PHILLIPS® tip, it has two series of cross-shaped ridges; the main ridges have a constant thickness that minimises the come-out effect. POZIDRIV® is widely used in the wood and timber industry.

POZIDRIV® est une marque déposée de PHILLIPS SCREW COMPANY et a été développée au début des années 60. Elle se différentie de l'empreinte PHILLIPS® avec sa double série de striures cruciformes. Les striures principales ont une épaisseur constante qui évite l'effet de sortie. POZIDRIV® s'utilise surtout dans le secteur du bois.

POZIDRIV® es una marca registrada de PHILLIPS SCREW COMPANY y se desarrolló a principios de los años 60. Se diferencia de la huella PHILLIPS® porque tiene una doble serie de crestas en forma de cruz; la crestas principales tienen un espesor constante que evita el efecto de salida (Come-out). POZIDRIV® se emplea sobre todo en el sector de la madera.

TORX®

TORX® è un marchio registrato di ACCUMENT GLOBAL TECHNOLOGIES e brevettato nel 1967 da Camcar Textron. TORX® sopporta coppie più elevate rispetto alle viti PH a parità di dimensioni. Ha largo utilizzo in campo automotive. Le sue varianti sono: con foro (TXH), TORX ALIGN® (conico, TW), TORX PLUS® (IP), TORX PLUS® con foro (IPR).

TORX® is a registered trademark of ACCUMENT GLOBAL TECHNOLOGIES and was patented by Camcar Textron in 1967. TORX® supports higher torques than PH screws of the same size. It is widely used in the automotive industry. It comes in the following versions: with slot (TXH), TORX ALIGN® (tapered, TW), TORX PLUS® (IP), TORX PLUS® with slot (IPR).

TORX® est une marque déposée d'ACCUMENT GLOBAL TECHNOLOGIES et brevetée en 1967 par Camcar Textron. TORX® supporte des couples plus élevés que les vis PH de la même taille. Elle est largement utilisée dans le secteur de l'automobile. Ses versions sont : avec trou (TXH), TORX ALIGN® (conique, TW), TORX PLUS® (IP), TORX PLUS® avec trou (IPR).

TORX® es una marca registrada de ACCUMENT GLOBAL TECHNOLOGIES, patentado en 1967 por Camcar Textron. TORX® soporta par de torsión más elevadas con respeto a los tornillos PH a paridad de dimensiones. Se emplea mucho en el sector del Automóvil. Sus variantes son: con orificio (TXH), TORX ALIGN® (cónico, TW), TORX PLUS® (IP) y TORX PLUS® con orificio (IPR).

ESAGONO

La vite con cava esagonale, inventata da Mr. W.G. Allen (1910), prende il nome italiano dalle Officine Egidio Brugola di Lissone che per prime la produssero e distribuirono in Italia. È utilizzata su viti con filettatura metrica ed impiegata principalmente in ambito meccanico, automotive e/o carpenteria metallica.

The hex socket screw was invented by W.G. Allen in 1910, the Italian name comes from the founder of the Officine Egidio Brugola of Lissone who first produced and marketed it in Italy. It is used on screws with metric thread, mainly in the mechanical, automotive and/or metal carpentry industries.

La vis à six pans creux fut inventée par Monsieur W.G. Allen en 1910. Le nom italien dérive du fondateur des Officine Egidio Brugola de Lissone qui la produisit et la commercialisa en premier en Italie. Elle est utilisée sur des vis avec filetage métrique et est principalement employée en mécanique, automobile et/ou charpenterie métallique.

El tornillo con ranura hexagonal fue inventado por Mr. W.G. Allen en 1910, El nombre italiano proviene del fundador de los Talleres Egidio Brugola de Lissone que fue el primero que lo produjo y vendió en Italia. Se usa sobre tornillos con rosca métrica y principalmente se emplea en el campo mecánico, del automóvil y/o en la carpintería metálica.

TAGLIO

Le prime tracce di viti con intaglio risalgono al tardo Medioevo. Le prime documentazioni si trovano nel Housebook medievale del castello di Wolfegg in Germania, in un manoscritto del 1490. Vengono oggi utilizzate soprattutto in ambito elettrico ed elettronico.

The first traces of slotted head screws date back to the late medieval period. Documentation was found in the Medieval Housebook of the castle of Wolfegg - Germany, a manuscript of 1490. Today, they are used mainly for electrical and electronic applications.

Les premières traces de vis à fente remontent à la fin du moyen-âge. On en trouve trace dans un manuscrit de 1490, dans le Housebook médiéval du château de Wolfegg - Allemagne. Elles sont maintenant utilisées surtout dans les équipements électriques et électroniques.

Los primeros tornillos provistos de corte se remontan a la tardía Edad Media. Hay documentos presentes en el Housebook de la Edad Media del castillo de Wolfegg - Alemania, un manuscrito de 1490. Hoy en día se usan sobe todo en el campo eléctrico y electrónico.

STRUTTURA ESPOSITORE PER STORE6 E STORE9
DISPLAY STRUCTURE FOR STORE6 AND STORE9
STRUCTURE PRÉSENTOIR POUR STORE6 ET STORE9
MOSTRADOR DE EXPOSICIÓN PARA STORE6 Y STORE9

COD. 66001005VC
Struttura metallica vuota + top
Empty metal structure + top
Structure en métal vide + Top
Estructura metálica vacía + top

610 X 600 X 150 mm

STRUTTURA METALLICA DA BANCO E APPENDIBILE. CASSETTIERE BASCULANTI SOVRAPPONIBILI CHE SI AGGANCIANO ALLA STRUTTURA.
LA MADIA PUÒ OSPITARE FINO A 6 FILE DI CASSETTIERE (4 SE DEL TIPO A 6 CASSETTI)

COUNTERTOP AND HANGABLE METAL STRUCTURE. UP-AND-OVER DRAWERS THAT CAN BE HOOKED ONTO THE STRUCTURE.
THE DISPLAY CABINET CAN HOLD UP TO 6 ROWS OF DRAWERS (4 FOR THE STORE6 CABINET)

MEUBLES À TIROIRS SUPERPOSABLES QUI S'ACCROCHENT À LA STRUCTURE.
LE MEUBLE PEUT ACCUEILLIR JUSQU'À 6 RANGÉES DE MEUBLES À TIROIRS (4 DE TYPE STORE6).

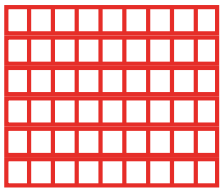

ESTRUCTURA METÁLICA PARA MOSTRADOR que se puede COLGAR. CAJONES BASCULANTES APILABLES QUE SE ENGANCHAN A LA ESTRUCTURA.
EL APARADOR PUEDE ALOJAR HASTA 6 FILAS DE CAJONES (4 SI ES DEL TIPO STORE6)

FOCUS ON

Una sfera che agisce sulla superficie del dado/bullone esercitando il trattenimento anche su acciaio inox, ottone o altri metalli non ferrosi.

A ball that acts on the surface of the nut/bolt, exerting retention even on stainless steel, copper or other non-ferrous metals.

Une bille qui agit sur la surface du boulon/écrou en exerçant une rétention même sur l'acier inoxydable, le laiton et les autres métaux non ferreux.

Una esfera que actúa en la superficie de la tuerca/perno ejercitando la retención también sobre acero inoxidable, latón u otros metales no ferrosos.

TIPS

Chiavi a bussola ad alta resistenza realizzate in acciaio speciale al cromo-silicio-vanadio, utilizzabili anche con avvitatori ad impulsi. (N.B: La massima forza applicabile non deve superare quelle indicate per l'attacco esagonale 1/4", vedi dati tecnici in coda al catalogo)

High-strength nut setters made of special chrome-silicon-vanadium steel, which can also be used with impact wrenches. (N.B: The maximum forces that can be applied must not exceed those specified for ¼" hex attachments, see technical data at the end of the catalogue)

Clés à douille haute résistance réalisées en acier spécial au chrome-silicium-vanadium, à utiliser également avec des visseuses à impulsions. N. B. : la force maximale applicable ne doit pas dépasser celles qui sont indiquées pour le raccord hexagonal 1/4". Voir les paramètres techniques à la fin du catalogue.

Vasos de alta resistencia realizadas de acero especial en cromo-silicio-vanadio. También se pueden usar con atornilladores a impulsos. (Nota: El máximo esfuerzo aplicable no tiene que superar el indicado para el empalme hexagonal de 1/4", véase los datos técnicos al final del catálogo)

FOCUS ON

Su richiesta possiamo realizzare chiavi a bussola fino a lunghezza 390 mm, con cave differenti (es. poligonale, TORX® femmina, quadro). Siamo inoltre in grado di tarare la durezza finale in base alle specifiche necessità.

On request, we are also able to manufacture nut setters up to 390 mm long, with different slots (e.g. polygonal, TORX® female, square). We are also able to calibrate the final hardness according to specific needs.

Sur demande, nous pouvons réaliser des clés à douilles jusqu'à 390 mm de longueur avec des creux différents (par exemple polygonale, TORX® femelle, carré). Nous pouvons aussi calibrer la dureté finale selon les besoins spécifiques.

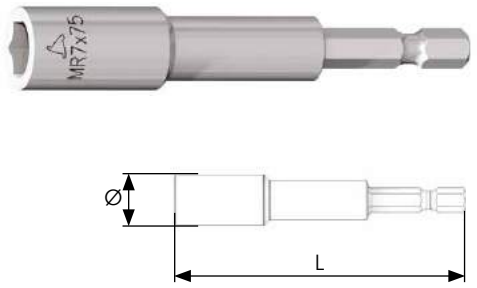

Bajo petición podemos realizar llaves de vaso de hasta una longitud de 390 mm, con diferentes ranuras (por ejemplo poligonal, TORX® hembra, cuadrada). También podemos calibrar la dureza final según las específicas necesidades.

FOCUS ON

Il sistema magnete retrattile permette sia il trattenimento magnetico del dado che l'ingresso libero della vite nella chiave per una profondità massima di 18mm.

The retractable magnet system allows both magnetic retention of the nut and the free entry of the screw into the nut setter for a maximum depth of 18mm.

Le système à aimant rétractable permet la rétention magnétique tant de l'écrou que l'entrée libre de la vis dans la clé sur une profondeur maximale de 18 mm.

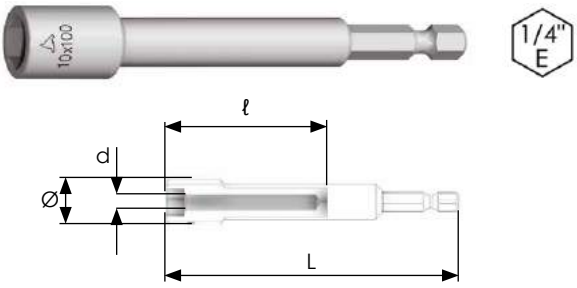

El sistema con imán retráctil permite ya sea la retención magnética de la tuerca que la entrada libre del tornillo en la llave por una profundidad máxima de 18mm.

FOCUS ON

Ideali quando il gambo filettato sporge molto dal dado o per l'avvitatura di prigionieri.

Ideal when the threaded shaft protrudes significantly from the nut or for screwing captive screws.

Idéales lorsque la tige filetée dépasse de l'écrou ou pour le vissage des goujons.

Ideales cuando el vástago roscado sobresale mucho de la tuerca o para el atornillado de los prisioneros.

Fino a non molti anni fa esistevano solo due tipi di porta-inserti: quello non magnetico e quello magnetico. Oggi le soluzioni offerte sono molte e scegliere l'accessorio giusto può essere di aiuto a rendere più facile il lavoro. Per questo motivo, la terza sezione del capitolo, dedicata agli accessori per inserti da 1/4", è ampiamente corredata di indicazioni e suggerimenti utili per individuare correttamente l'accessorio più adatto.

The market for bit holders offers solutions that are increasingly more specific and that adapt well to the working conditions or workpieces. Having the right accessory will make the job easier and faster. For this reason, the third section of the chapter contains accessories for 1/4" bits together with lots of useful suggestions and tips on how to find the most suitable accessory for every type of application or work environment.

Le marché des porte-embouts offre des solutions de plus en plus spécifiques qui s'adaptent aux conditions de travail ou aux matériaux sur lesquels on travaille. Choisir le bon accessoire permet de travailler plus simplement et rapidement. C'est pour cette raison que la troisième section du chapitre 1 dédiée aux accessoires pour les embouts 1/4", est largement illustrée de mises au point et conseils pour choisir correctement l'accessoire le mieux adapté à chaque type d'application ou lieu de travail.

El mercado de los porta puntas ofrece soluciones cada vez más específicas que se adaptan bien a las condiciones de trabajo o a los materiales sobre los cuales se trabaja; elegir el accesorio justo supone una gran ayuda para simplificar y hacer más rápido el trabajo. Por esta razón, en la tercera sección del capitulo1, dedicada a los accesorios para puntas de 1/4" hay muchas sugerencias y se tratan temas útiles para individuar de forma correcta el accesorio más idóneo para cada tipo de aplicación o lugar de trabajo.

COME SCEGLIERE IL PORTAINSERTO

HOW TO CHOOSE A BIT HOLDER
COMMENT CHOISIR LE PORTE-EMBOUT
CÓMO ELEGIR EL PORTA PUNTA

NON MAGNETICI
Non-magnetic
Sans aimant
No magnéticos

RECOMMENDED

Quando si lavora in presenza di limatura, polvere o trucioli d ferro.

For working in the presence of filings, dust or iron shavings.

Lorsqu'il faut travailler en présence de limaille, de poussière ou de copeaux en fer.

Cuando se trabaja ante la presencia de limadura, polvo o virutas de hierro.

DOPPIO MAGNETE
Double magnets
Double aimant
Doble imán

RECOMMENDED

Con viti di grosse dimensioni o lunghe (viti per coperture edilizie).

With large or long screws (screws for building roofs).

Avec des grandes ou longues vis (vis de toiture).

Con tornillos de grandes dimensiones o largos (tornillos para coberturas de la construcción).

SGANCIO RAPIDO
Quick release
Déclenchement rapide
Desenganche rápido

RECOMMENDED

Se si devono indossare guanti, o se le mani sono sporche di olio.

If you have to wear gloves or if your hands are oily.

S'il faut porter des gants, ou si les mains sont souillées d'huile.

Si hay que usar guantes o si las manos están sucias de aceite.

SNODATI O FLESSIBILI
Jointed or flexible
Articulés ou flexibles
Articulados o flexibles

RECOMMENDED

Vicino ad uno spigolo (zoccolini, mobili, cassetti, motori di auto, parafanghi).

Close to an edge (skirting boards, furniture, drawers, car engines, mudguards).

À proximité d'un angle (plinthes, meubles, tiroirs, moteurs de voiture, garde-boue).

Cerca de una arista (zócalos, muebles, cajones, motores de automóviles, parachoques).

MANDRINO DI BLOCCO
Chuck
Mandrin de blocage
Mandril de bloqueo

RECOMMENDED

Se l'inserto si blocca nella cava della vite, se il punto in cui va posizionata la vite è difficilmente raggiungibile.

If the bit becomes stuck in the slot of the screw, if the point where the screw is to be positioned is difficult to reach.

Si l'embout se bloque dans la fente de la vis, si le point où la vis sont placés dans un endroit difficile à atteindre.

Si la punta se bloquea en la ranura del tornillo; si es difícil llegar al punto en donde se coloca el tornillo.

BUSSOLE MAGNETICHE
Magnetic sockets
Douilles magnétiques
Vasos magnéticos

RECOMMENDED

In caso di fori profondi o alloggiamenti particolarmente stretti.

In case of deep holes or particularly tight seats.

En cas de trous profonds ou de logements particulièrement étroits.

En caso de orificios profundos o de alojamientos particularmente estrechos.

ADATTATORI

ADATTATORI PER BUSSOLE 1/4"C E 1/4"E

Adapters for 1/4"C and 1/4"E sockets
Adapteurs pour douilles 1/4"C et 1/4"E
Adaptadores para vasos 1/4"C y 1/4"E

A = secondo DIN 3121 Forma E, con perno di trattenimento in acciaio per molle. Indicati per l'utilizzo con bussole IMPACT; il perno assicura il bloccaggio della bussola evitandone la perdita anche su impianti automatici.

***A** = according to DIN 3121 Form E Standard, with retention pin in spring steel. Suitable for use with IMPACT sockets; the pin ensures the locking of the socket, preventing loss even on automatic systems.*

***A** = selon DIN 3121 forme E, avec goupille de retenue en acier pour ressorts. Adapté pour l'utilisation avec les douilles IMPACT. Le goujon garantit le blocage de la douille en évitant la perte même sur les installations automatiques.*

***A** = según DIN 3121 Forma E, con perno de retención de acero para resortes. Aptos para un uso con llaves de vaso IMPACT; el perno asegura el bloqueo de la llave tubular evitando que se suelte incluso sobre plantas automáticas.*

B = secondo DIN 3120 Forma A, con sfera in acciaio. Indicati per l'utilizzo con bussole CHROME; la sfera favorisce il montaggio e lo smontaggio della bussola.

***B** = according to DIN 3120 Form A Standard, with steel ball. Suitable for use with CHROME sockets; the ball facilitates assembly and disassembly of the socket.*

***B** = selon DIN 3120 forme A, avec bille en acier. Adapté pour l'utilisation avec les douilles CHROME. La bille simplifie le montage et le démontage de la douille.*

***B** = según DIN 3120 Forma A, con esfera de acero. Apto para un uso con llaves de vaso CHROME; la esfera facilita el montaje y el desmontaje de la llave tubular.*

Realizzati con lo stesso accaio di alta qualità utilizzato per gli inserti che offre un ottimo equilibrio tra durezza e tenacità.

Made with the same high-quality steel used for the bits, which provides an excellent combination of hardness and toughness.

Fabriqués avec le même acier de haute qualité utilisé pour les embouts, qui offre un excellent équilibre entre dureté et ténacité.

Fabricados con el mismo acero de alta calidad usado para las puntas, que ofrece un óptimo equilibrio entre dureza y tenacidad.

Progettati per il massimo rendimento in coppia con le bussole IMPACT e CHROME della gamma LTI.

Designed for maximum performance in combination with IMPACT and CHROME sockets from the LTI range.

Conçus pour des performances maximales en tandem avec des douilles IMPACT et CHROME de la gamme LTI.

Diseñados para el máximo rendimiento de par de torsión con llaves de vaso IMPACT y CHROME de la gama LTI.

La gamma comprende anche la versione con attacco SDS PLUS in uso sui trapani martellatori per edilizia.

The range also includes the version with SDS PLUS attachment for use on hammer drills in the construction industry.

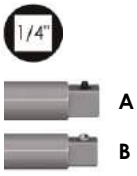

La gamme comprend également la version avec queue SDS PLUS utilisé sur les marteaux piqueurs pour le bâtiment.

La gama también incluye la versión con empalme SDS PLUS para uso con martillos para construcción.

70 X 120 mm

FOCUS ON

Diametro foro 7mm, doppio magnete, trattenimento fino a 400 gr. Agisce anche a 12cm dalla vite. Si consiglia di forzare la bussola sull'attacco esagonale per assicurarne la posizione. Indicato anche per giravite con lama fino a diametro 7.

Hole diameter of 7 mm, two magnets, retention up to 400 g. Also acts at a distance of up to 12cm from the screw. Recommended for mounting the socket onto the hexagon attachment to ensure its position. Suitable also for screwdrivers with minimum blade diameter of 7.

Diamètre du trou 7 mm, double aimant, rétention jusqu'à 400 grammes. Il agit également à 12cm de la vis. Nous recommandons de forcer la douille sur le raccord hexagonal pour assurer sa position. Convient aussi pour les tournevis avec lame jusqu'à 7 mm de diamètre.

Diámetro orificio de 7mm, doble imán, retención de hasta 400gr. También actúa a 12cm del tornillo. Se aconseja forzar la llave tubular sobre el empalme hexagonal para asegurar la posición. También es apto para destornilladores con lama hasta un diámetro de 7.

FOCUS ON

Applicata sul portainserti permette di trattenere sull'inserto viti che non possono essere trattenute da sisemi magnetici.

Applied on the bit holder it allows to retain on the insert screws that cannot be retained by magnetic systems.

Appliqué sur le porte-embout, il permet de retenir sur l'embout des vis qui ne peuvent pas être retenues par les systèmes magnétiques.

Aplicado sobre el portapuntas, permite retener sobre la punta tornillos que no sostenerse mediante sistemas magnéticos.

Il capitolo 2 è dedicato alle tipologie di inserti più speciali ed indicati per campi di applicazione particolari come il settore industriale, quello meccanico o dell'elettronica. In questi ambiti vengono infatti richiesti anche inserti ed accessori con attacchi differenti da quello presentato nel primo capitolo.
Il reparto di produzione interno, dotato di moderne macchine per la lavorazione ed il trattamento termico, ci permette inoltre di studiare e realizzare utensili secondo le specifiche indicate dal cliente stesso. Sono ormai migliaia i codici di inserti ed accessori speciali che abbiamo fabbricato per clienti di tutto il mondo.

Chapter 2 is devoted to specific types of bits, manufactured expressly for special applications in the industrial, mechanical, electronic or precision sectors. In fact, these sectors require bits and accessories with attachments and tips different from those presented in the first chapter.
Our internal production department, equipped with modern machinery for machining and heat treatments, allows us to design and create tools according to customer specifications. We produce thousands of special bits and accessories for our customers around the world.

Le chapitre 2 est consacré aux types d'embouts plus spécifiques, expressément conçus pour des champs d'application uniques comme le secteur industriel, mécanique ou de l'électronique ou de précision. Ces domaines requièrent en effet des embouts et des accessoires avec des raccords et des empreintes différents de ceux présentés dans le premier chapitre.
Notre atelier de production interne, équipé de machines modernes pour l'usinage et le traitement thermique, nous permet d'étudier et de réaliser des outils selon les spécificités indiquées par le client. Les codes d'embouts et d'accessoires spéciaux que nous construisons pour nos clients du monde entier sont des milliers.

El capitulo 2 está dedicado a los tipos de puntas más específicos, especialmente fabricados para campos de aplicación únicos, como el sector industrial, el mecánico o el de la electrónica o de precisión. En estos ámbitos se necesitan puntas y accesorios con empalmes y huellas diferentes de los que se han presentado en el primer apartad.
Nuestro departamento de producción interno, provisto de modernas máquinas para la elaboración y el tratamiento térmico, nos permite estudiar y realizar utensilios siguiendo las especificaciones indicadas por el cliente. Son miles los códigos de puntas y de accesorios especiales que fabricamos para nuestros clientes de todo el mundo.

INSERTI E CHIAVI SPECIALI PER L'INDUSTRIA, L'AUTOMAZIONE E LA MANUTENZIONE

Special bits and setters for the industrial, automation and maintenance sectors.
Embouts et clés spéciales pour le secteur de l'industrie, de l'automation industrielle et de la maintenance.
Puntas y llaves especiales para el sector de la industria, de la automatización industrial y del mantenimiento.

1

Nel campo meccanico, per la produzione e riparazione di motori, e nella cantieristica, ambiti nei quali è necessario l'uso di fasteners di diametri elevati e a massime prestazioni, vengono utilizzati inserti con attacco maggiorato ed impronte a 6 e 12 lobi che permettano una migliore distribuzione della coppia di serraggio. Un appropriato acciaio al Cromo Silicio Vanadio garantisce una elevata resistenza ed una maggiore elasticità.

Bits with larger attachments and tips with 6 and 12 lobes, which provide better distribution of the tightening torque, are commonly used in the mechanical industry for the production and repair of engines, and in shipbuilding yards. These areas require the use of fasteners with wide diameters and high performances. Chrome-silicon-vanadium steel guarantees high resistance and greater elasticity.

Dans le domaine de la mécanique, pour la production et la réparation des moteurs et dans l'industrie de la construction navale, domaines dans lesquels l'utilisation de fixations avec des diamètres élevés à haute performance est nécessaire, nous utilisons des embouts avec des raccords majorés et des empreintes à 6 et 12 lobes qui permettent une meilleure distribution du couple de serrage. Un acier approprié au chrome-silicium-vanadium garantit une résistance élevée et une plus grande élasticité.

En el campo de la mecánica, para la producción y reparación de motores, y en los astilleros, ámbitos en los cuales es necesario el uso de elementos de sujeción de grandes diámetros y de elevadas prestaciones, se usan puntas con empalmes aumentados y huellas de 6 a 12 lóbulos que permitan una mejor distribución de la par de torsión de cierre. Un apropiado acero al Cromo Silicio Vanadio garantiza una elevada resistencia y una mayor elasticidad.

2

I dispositivi elettronici sono ormai nelle mani di tutti e, con loro, le micro viti sono largamente diffuse. Prerogativa di questo tipo di fasteners è l'estrema precisione: è molto facile rovinare l'impronta o il filetto. Per questo tipo di applicazioni abbiamo selezionato una serie di inserti con le impronte più comuni, realizzati con un acciaio apposito, estremamente tenace, per evitare deformazioni del l'impronta che possano danneggiare la cava della vite.

Suitable for the production of electronic devices where micro-screws are widely used. The special feature of this type of fastener is its extreme precision: it is very easy to ruin the tip or thread. For these types of applications, we selected a series of bits with more common tips, made with special, extremely strong, steel to prevent deformations of the tip that might damage the slot of the screw.

Dans le domaine des appareils électroniques où les micro-vis sont largement diffusées, la précision extrême est la prérogative de ce type de fixation. Il est très facile d'abîmer l'empreinte ou le filetage. Pour ce type d'application, nous avons sélectionné un certain nombre d'embouts avec les empreintes les plus communes, réalisés à l'aide d'un acier spécial, extrêmement tenace, afin d'éviter toute déformation de l'empreinte, qui pourrait endommager la fente de la vis.

En el campo de los dispositivos electrónicos donde los micro tornillos son muy difundidos. Prerrogativa de este tipo de sujeción es la extrema precisión: es muy fácil estropear la huella y la rosca. Para este tipo de aplicación hemos seleccionado una serie de puntas con las huellas más comunes, realizadas con el acero indicado, extremadamente tenaz, para evitar deformaciones de la huella que puedan dañar la ranura del tornillo.

3

La produzione di utensili per applicazioni industriali e per impianti di assemblaggio automatizzati è sicuramente un settore nel quale il marchio LTI si è da sempre contraddistinto. Grazie a questa nostra specificità, da sempre apprezzata dai nostri clienti, ogni due giorni introduciamo un nuovo codice prodotto. Abbiamo quindi selezionato una gamma di utensili industriali sempre disponibili a magazzino e con un prezzo di listino fisso a prescindere dalla quantità, ponendo la massima attenzione alla qualità per garantire la massima affidabilità.

The LTI brand has always been a pioneer in the production of tools for industrial applications and for automated assembly systems. For this case, we also offer a range of industrial tools that are always in stock, placing maximum attention on the construction to guarantee maximum reliability.

La production d'outils pour applications industrielles et installations d'assemblage automatisées est sans aucun doute un des secteurs dans lequel la marque LTI s'est depuis toujours distinguée. Nous avons sélectionné également dans ce cas, une gamme d'outils industriels toujours en stock, en accordant une attention maximum dans la construction pour garantir une fiabilité maximum.

La producción de utensilios para aplicaciones industriales y para plantas de ensamblaje automatizadas es seguramente uno de los sectores en el cual la marca LTI ha destacado desde siempre. También en este caso hemos seleccionado una gama de utensilios industriales siempre disponibles en almacén, prestando la máxima atención a la fabricación para garantizar la máxima fiabilidad.

FOCUS ON

I dispositivi elettronici sono ormai nelle mani di tutti e, con loro, le micro viti sono largamente diffuse. Prerogativa di questo tipo di fasteners è l'estrema precisione.

Suitable for the production of electronic devices where micro-screws are widely used. The special feature of this type of fastener is its extreme precision.

Dans le domaine des appareils électroniques où les micro-vis sont largement diffusées, la précision extrême est la prérogative de ce type de fixation.

En el campo de los dispositivos electrónicos donde los micro tornillos son muy difundidos. Prerrogativa de este tipo de sujeción es la extrema precisión.

FOCUS ON

Per completare l'assortimento delle impronte per micro-viti più usate, abbiamo aggiunto un'impugnatura in alluminio con mandrino rapido di elevata qualità e praticità ed una prolunga magnetica.

To complete the range of tips for the most common micro-screws, we have added a practical aluminium handle with a chuck of the highest quality and a magnetic extension.

Pour compléter l'assortiment des empreintes pour micro-vis les plus utilisées, nous avons ajouté une poignée en aluminium avec mandrin rapide de haute qualité très pratique et une rallonge aimantée.

Para completar el surtido de huellas para micro tornillos más usadas, hemos añadido un mango de aluminio con mandril rápido de elevada calidad y practicidad y una extensión magnética.

FOCUS ON

Connessione di tipo rinforzato, ottimizza la resistenza del filetto evitando la necessità di ridurre la durezza. Il sistema inserto + portainserti risulta estremamente indicato nell applicazioni industriali con avvitatori automatici/autoalimentati e su impianti di avvitatura complessi. In questi casi sono estremamente importanti l'affidabilità del prodotto e la sua capacità di resistere all'usura. Per questi motivi i nostri inserti vengono realizzati con tolleranze minime su macchine estremamente precise con l'obbiettivo di garantire la massima qualità. La connessione di tipo rinforzato permette inoltre di mantenere elevata la durezza dell'inserto.

Reinforced connection optimises the resistance of the thread, preventing the need to reduce the hardness. The bit + bit-holder system is very suitable in industrial applications that use automatic/self-powered drivers and complex screwing systems. In these cases, product reliability and wear resistance are extremely important. For these reasons, our bits are manufactured with minimum tolerances on high-precision machines aimed at ensuring maximum quality. The reinforced connection also allows maintaining excellent hardness of the bit.

Raccord renforcé, il optimise la résistance du filetage en évitant la nécessité d'en réduire la dureté. Le système embout + porte-embout est particulièrement indiqué dans les applications industrielles avec visseuses automatiques/autoalimentées et sur des installations de vissage complexes. Dans ces cas, la fiabilité du produit et sa capacité à résister à l'usure sont extrêmement importantes. Pour ces raisons, nos embouts sont fabriqués avec des tolérances minimum sur des machines extrêmement précises afin d'assurer la meilleure qualité. Le raccord de type renforcé permet de maintenir une dureté élevée de l'embout.

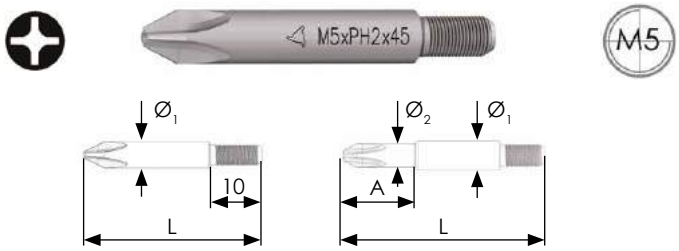

Conexión de tipo reforzado, optimiza la resistencia de la rosca evitando la necesidad de tener que reducir la dureza.
El sistema punta + porta puntas resulta especialmente indicado en las aplicaciones industriales con atornilladores automáticos/auto alimentados y en los sistemas de atornillado complejos. En estos casos es muy importante la fiabilidad del producto y su capacidad de resistir al desgaste. Por estas razones nuestras puntas se realizan con mínimas tolerancias sobre máquinas muy precisas con el objeto de garantizar la máxima calidad. Además las conexiones de tipo reforzado permiten mantener elevada la dureza de la punta.

FOCUS ON

Esempio di avvitatore autoalimentato con applicazione di portainserti ed inserto filettati (per gentile consessione di MTA TECH S.r.l.)
Example of self-powered screwdriver with application of bit holder and threaded insert (by kind permission of MTA TECH S.r.l.)
Exemple de visseuse autoalimentée avec application de porte-embouts et embout filetés (avec l'aimable autorisation de MTA TECH S.r.l.)
Ejemplo de atornillador autoalimentado con aplicación de porta puntas e inserto roscados (gracias a la concesión de MTA TECH S.r.l.)

I nostri portainserti filettati sono realizzati con lo stesso acciaio di alta qualità che utilizziamo per gli inserti. Il trattamento termico è calibrato per ottenere anche in questo caso il miglior equilibrio tra durezza e tenacità. Come ultima fase di lavorazione, prima dello stoccaggio, viene controllata la rettilinerità di questi prodotti e viene eventualmente eseguita un operazione di raddrizzatura al fine di garantire una concentricità non inferiore a 0,1mm.

Our threaded bit holders are made with the same high-quality steel used for the bits. The heat treatment is calibrated to obtain the best balance between hardness and toughness. As a final machining phase before storage, the straightness of these products is checked and if necessary, they are straightened to ensure concentricity of not less than 0.1 mm.

Nos porte-embouts filetés sont fabriqués avec le même acier de haute qualité que nous utilisons pour les embouts. Le traitement thermique est calibré pour obtenir, dans ce cas également, un meilleur équilibre entre dureté et ténacité. Comme dernière étape d'usinage, avant le stockage, la rectilinéarité de ces produits est contrôlée et une opération de redressage est effectuée afin de garantir une concentricité d'au moins 0,1 mm.

Nuestros porta puntas han sido realizados con el mismo acero de alta calidad que se usa para las puntas. El tratamiento térmico está calibrado para obtener también en este caso el mejor equilibrio entre dureza y tenacidad. Como última fase de elaboración, antes del almacenaje, se controla que los productos estén derechos y eventualmente se realiza una operación de enderezamiento con el fin de garantizar una concentricidad por debajo de los 0,1mm.

TIPS

Su richiesta realizziamo anche gli adattatori con attacco 1/4" ed innesto alesato. Per avvitatori autoalimentati tipo vegetti.

On request, we also produce adapters with ¼" attachment and bored coupling. For self-powered screwdrivers.

Nous réalisons sur demande aussi les adaptateurs avec queue 1/4" et raccord fraisé. Pour les visseuses autoalimentées.

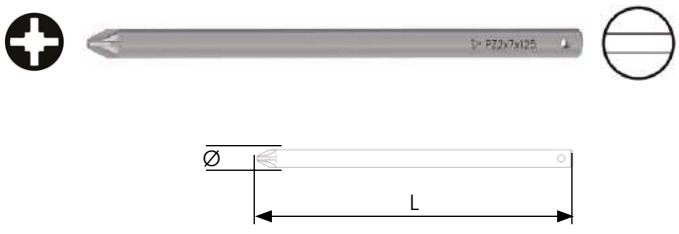

Bajo petición también realizamos adaptadores con empalme de 1/4" y con enganche escariado. Para atornilladores autoalimentados.

FOCUS ON

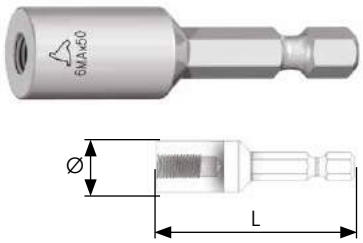

① In fase di avvitatura la ghiera ruota e si sposta verso la bussola filettata.
② In fase di svitamento la ghiera ruota in senso inverso allontanandosi dalla bussola filettata così da liberarla.
① In the phase of screwing, the ring nut rotates and moves toward the threaded socket.
② In the phase of unscrewing, the ring nut rotates in the opposite direction and moves away from the threaded socket, in order to free it.
① Pendant le vissage, la bague tourne et se déplace vers la douille filetée.
② Pendant le dévissage, la bague tourne dans le sens contraire en s'éloignant de la douille filetée pour la libérer.
① En la fase de atornillado la abrazadera gira y se desplaza hacia la llave tubular roscada.
② En la fase de destornillado el cuerpo interno se retrae del tope soltando el prisionero.

Le bussole con attacco quadro sono l'utensile utilizzato per l'avvitatura nel settore automotive e della carpenteria pesante. Con gli avvitatori a massa battente è indispensabile, anche per motivi di sicurezza, utilizzare bussole ed accessori IMPACT, mentre negli altri casi possono essere utilizzate bussole ed accessori cromati. In questo capitolo presentiamo entrambe le soluzioni, a completamento delle linee di utensili per avvitatori nell'ottica di un servizio adeguato ed esaustivo per tutta la nostra clientela.

Sockets with square attachment are used for screwing applications in the automotive and heavy carpentry industries. With impact wrenches is it essential, also for safety reasons, to use IMPACT sockets and accessories, while standard sockets and accessories can be used in other cases. In this chapter we present both solutions to complement the range of tools for screwdrivers with a view to provide an adequate and exhaustive service.

Les douilles avec raccord carré sont utilisées pour le vissage dans le secteur d'automobile et la menuiserie lourde. Avec les visseuses à masse battante, il est essentiel, pour des raisons de sécurité également, d'utiliser des douilles et des accessoires IMPACT, tandis que dans d'autres cas des douilles et des accessoires standard peuvent être utilisés. Dans ce chapitre, nous présentons les deux solutions, pour compléter les lignes d'outils pour les visseuses dans l'optique d'un service adéquat et exhaustif.

Los vasos con empalme cuadrado son el utensilio que se emplea para el atornillado en el sector de los automóviles y de la construcción pesada. Con los atornilladores de impacto es indispensable, también por razones de seguridad, usar vasos y accesorios IMPACT, mientras que en los demás casos pueden usarse vasos y accesorios estándares. En este capitulopresentamos las dos soluciones para completar las líneas de utensilios para atornilladores y proporcionar un servicio adecuado y exhaustivo.

Costruite in acciaio da bonifica al Nickel Cromo Molibdeno, secondo gli standard internazionali. Rivestimento protettivo anti-ossidazione.

Manufactured in Nickel-Chrome-Molybdenum tempered steel, according to international standards. Protective anti-oxidation coating.

Fabriqués en acier de trempe et revenu au nickel-chrome-molybdène, selon les normes internationales. Revêtement de protection anti-oxydation.

Fabricadas con acero templado y revenido de Níquel Cromo Molibdeno, según los estándares internacionales. Recubrimiento protector contra la oxidación.

Spigoli del quadro e dell'esagono arrotondati per distribuire meglio lo sforzo di torsione e minimizzare il rischio di rottura.

Edges of the square and hexagon are rounded to better distribute torsional stress and minimise the risk of breakage.

Les angles du carré et de l'hexagone arrondis répartissent au mieux la contrainte de torsion et minimisent le risque de rupture.

Aristas del cuadrado y del hexágono redondeados para distribuir mejor el esfuerzo de torsión y minimizar el riesgo de ruptura.

Specificatamente indicate per gli usi industriali, con avvitatori ad impulsi e/o a massa battente.

Suitable for industrial use, with pulse and/or impact wrenches.

Particulièrement indiquées pour des utilisations industrielles, avec des visseuses à impulsions et/ou à masse battante.

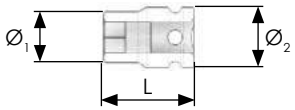

Indicado en específico para usos industriales, con atornilladores de impulsos y o percutores.

FOCUS ON

Le ghiere filettate autobloccanti (KMA - GUK - GUP) si riconoscono dalla presenza di un anello interno di nylon che, al momento dell'avvitamento, crea un effetto bloccante tra vite e madre-vite.

The self-locking threaded ring nuts (KMA – GUK - GUP) are recognised by the presence of an inner nylon ring that, at the time of screwing, creates a blocking effect between the screw and mother-screw.

Les bagues filetées indésserrables (KMA - GUK - GUP) se reconnaissent par la présence d'un anneau intérieur en nylon qui, au moment du vissage, crée un effet de blocage entre la vis et la vis-mère.

Las abrazaderas roscadas de bloqueo automático (KMA - GUK – GUP) se reconocen por la presencia de un anillo interno de nylon que, durante el atornillado, crea un efecto bloqueante entre el tornillo y tornillo madre.

CHROME

BUSSOLE E ACCESSORI CHROME

CHROME sockets and accesories
Douilles et accessoires CHROME
Vasos y accessorios CHROME

Realizzate in acciaio al Cromo Vanadio di alta qualità. Collare godronato per una miglior presa e resistente rivestimento superficiale di cromatura.

Made in high quality Chrome-Vanadium steel. Knurled collar for better grip and resistant chrome-plated surface coating.

Réalisées en acier de chrome-vanadium de haute qualité. Collier moleté pour une meilleure adhérence et revêtement de surface résistant chromé.

Fabricadas con acero al Cromo Vanadio de alta calidad. Collar moleteado para un mejor agarre y recubrimiento superficial resistente cromado.

Impronta esagonale tipo SUPER- LOCK: il contatto con il dado non avviene sullo spigolo ma sulla faccia dell'esagono, che offre una maggior superficie di appoggio.

SUPER-LOCK hex tip: the contact with the nut does not take place on the edge, but on the face of the hexagon, which offers a larger support surface.

Empreinte 6 pans creux type SUPER-LOCK : le contact avec l'écrou ne se produit pas par l'angle, mais sur la face de l'hexagone, qui offre une plus grande surface d'appui.

Huella hexagonal tipo SUPER- LOCK: el contacto con la tuerca no se realiza sobre la arista, sino sobre la cara del hexágono, que ofrece una mayor superficie de apoyo.

Indicate per applicazioni manuali in ambito professionale.

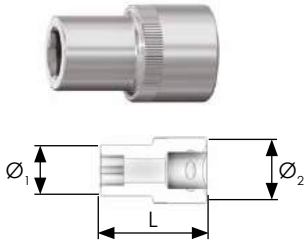

Suitable for professional manual applications.

Convient pour les applications manuelles dans un environnement professionnel.

Aptas para aplicaciones manuales en ámbito profesional.

INNOVATION IS AN ATTITUDE

Le conoscenze maturate con gli utensili per avvitatori ci permettono di offrire anche una gamma base di utensili manuali di alta qualità. Una gamma base di tipologie usate in operazioni di avvitatura, corredate di assortimenti e confezioni dedicati all'esposizione in punto vendita.

The knowledge gained from the production of tools for screwdrivers allows us to offer a basic range of high-quality hand tools to complement the range offered in the previous chapters, and the range of tips used in screwing operations, equipped with different collections and packaging for store displays.

Les connaissances acquises avec la production d'outils pour les visseuses nous permettent d'offrir une gamme de base d'outils manuels de haute qualité pour compléter le programme offert dans les chapitres précédents. Une gamme d'empreintes utilisées dans les opérations de vissage, accompagnée d'assortiments et d'emballages dédiés à l'exposition dans les points de vente.

Los conocimientos adquiridos con la producción de los utensilios para atornilladores nos permiten ofrecer una gama base de utensilios manuales de alta calidad para completar el programa ofrecido en los capitulos precedentes. Una gama de tipos de huellas que se emplean en las operaciones de atornillado, con muchos accesorios y lista para la exposición en un punto venta.

FOCUS ON

La custodia, dotata di gancio di sicurezza, diventa anche una pratica impugnatura per manovrare ogni chiave in modo più confortevole.

The housing, equipped with safety hook, also becomes a practical handle to comfortably manoeuvre each wrench.

L'étui, équipé d'un crochet de sécurité, devient également une poignée pratique pour manœuvrer chaque clé de façon plus confortable.

El estuche, provisto de enganche de seguridad, se convierte también en un práctico mango para poder usar cada llave de forma más cómoda.

FOCUS ON

La testa sferica magnetica consente di trattenere la vite in posizione anche in caso di lavori difficoltosi diminuendo il rischio di perdere il fastener.

The spherical magnetic head allows holding the screw in position even during difficult machining, reducing the risk of losing the fastener.

La tête sphérique magnétique permet de retenir la vis dans sa position même en cas de travaux difficiles, en réduisant le risque de perdre la fixation.

El cabezal esférico magnético permite mantener el tornillo en su sitio incluso cuando se realicen trabajos difíciles disminuyendo el riesgo de perder la abrazadera.

FOCUS ON

L'elevato flusso luminoso (lumen) di questo proiettore abbinato alla sua alta capacità di illuminamento (1200 lux), lo rende molto indicato per illuminare ampie superfici.

The high luminous flux (lumens) of this projector combined with its high illumination capacity (1200 lux), makes it very suitable for illuminating large areas.

Le flux lumineux élevé (lumens) de ce projecteur, associé à sa grande capacité d'éclairage (1200 lux), le rend très approprié pour éclairer de grandes surfaces.

El alto flujo luminoso (lúmenes) de este proyector, combinado con su alta capacidad de iluminación (1200 lux), lo hace muy adecuado para iluminar grandes superficies.

FOCUS ON

L'attenzione ai dettagli che da sempre contraddistingue il marchio LTI si riflette anche nel supporto alla clientela: nelle seguenti pagine vogliamo guidarvi nell'utilizzo dei nostri prodotti in maniera semplice ma allo stesso tempo fornendovi una panoramica precisa e dettagliata.
Le nostre schede tecniche sono lo strumento perfetto per approcciarsi a qualsiasi tipo di operazione in sicurezza e con la tranquillità di aver scelto lo strumento più adatto per il conseguimento del risultato ottimale.

The attention to detail that has always distinguished the LTI brand is also reflected in the customer support. The following pages will guide you on how to use our products in a simple way and also provide you with accurate and detailed information.
Our technical datasheets are the perfect tool to help you carry out any type of operation safely and with the certainty of having chosen the right tool for the best results.

L'attention apportée au détail qui distingue depuis toujours la marque LTI se reflète également dans le support à la clientèle. Dans les pages suivantes, nous voulons vous guider dans l'utilisation de nos produits de façon simple mais en fournissant aussi un aperçu précis et détaillé.
Nos fiches techniques sont l'outil idéal pour approcher tout type d'opération en toute sécurité et en étant certain de choisir le bon outil pour l'obtention de résultats optimaux.

La atención a los detalles que desde siempre distingue a la marca LTI también se refleja en la asistencia a la clientela: en las siguientes páginas encontrarán una guía sobre como usar nuestros productos de manera sencilla, pero al mismo tiempo les ofreceremos una visión completa precisa y detallada.
Nuestras fichas técnicas son el instrumento perfecto para acercarse a cualquier tipo de operación con completa seguridad y con la tranquilidad de haber elegido el instrumento más adecuado para conseguir un resultado óptimo.

CONDIZIONI DI VENDITA

GENERAL SALES CONDITIONS
CONDITIONS GENERAL DE VENTE
CONDICIONES GENERALES DE VENTA

Le condizioni di seguito riportate si intendono accettate dal committente in fase di ordinazione.

1. ORDINI: con il conferimento dell'ordine si intendono approvate dal committente tutte le condizioni di vendita in vigore, salvo accordi particolari accettati dai contraenti. Tutti gli ordini sono irrevocabili da parte del committente ma potranno non essere da noi evasi a nostro insindacabile giudizio e senza obbligo di comunicazione o giustificazione. Nell'ordine è necessario specificare il codice dell'articolo.
2. PREZZI: i prezzi si intendono per merce franco nostro magazzino (imballo, iva, trasporto esclusi) e non sono impegnativi. I prezzi che avranno valore saranno quelli in vigore al momento della spedizione.
3. IMBALLO: gratuito, salvo specifiche richieste del committente, che verranno fatturate al costo.
4. SPEDIZIONE: verrà effettuata come segue:
a) a mezzo nostro corriere di fiducia, in porto franco con addebito in fattura, in tal caso la merce sarà parzialmente assicurata** (vedere punto 10 dell'elenco);
b) a corriere di fiducia del committente: la resa sarà franco nostro stabilimento di Monticello e la merce viaggia a totale rischio e pericolo del committente. Pertanto in caso di ritardi, ammanchi, avaria, furti, etc. i reclami devono essere indirizzati al Vettore, solo ed unico responsabile.
5. CONSEGNE: il termine di consegna, qualora venisse indicato, è puramente indicativo e pertanto solleva la nostra società da ogni qualsivoglia rivalsa.
6. RECLAMI: debbono pervenire per iscritto entro 8 giorni dalla data di ricevimento merce. Trascorso tale termine, i reclami non verranno accettati. I reclami di qualsiasi natura non sospendono l'obbligo di effettuare i pagamenti nella forma convenuta. L'acquirente, nel caso che la merce sia da noi ritenuta non idonea, ha diritto esclusivamente alla sostituzione della stessa o all'accredito dell'importo. Ogni altro tipo di indennizzo si intende privo di valore. Per qualsiasi contestazione si elegge unico foro competente quello del Tribunale di Lecco.
7. RESI: ogni reso o sostituzione dovrà essere preventivamente autorizzato da KRINO SPA. La merce sarà accettata di ritorno, salvo verifica all'arrivo in magazzino. Questa dovrà essere inviata in porto franco e accompagnata dalla bolla di consegna con indicati gli estremi della fattura con la quale è stata precedentemente fornita.
8. PAGAMENTI: debbono essere effettuati esclusivamente alla nostra sede, secondo le forme concordate. Nel caso di ritardato pagamento, verranno addebitati gli interessi bancari dalla data di scadenza concordata sino all'avvenuto pagamento, maggiorati delle eventuali spese accessorie.
9. CARATTERISTICHE DEI PRODOTTI: le immagini contenute nel presente catalogo sono puramente indicative, pertanto la nostra azienda si riserva il diritto di apportare modifiche migliorative dei prodotti senza nessun obbligo di preavviso.

LA RIPRODUZIONE ANCHE PARZIALE DEL PRESENTE CATALOGO È VIETATA

10. VALORE DELL'ORDINE: la spedizione verrà effettuata come segue:
- ordini singoli (non cumulabili) di importo superiore a Euro 600,00: spedizione in porto franco a mezzo nostro corriere di fiducia;
- ordini singoli (non cumulabili) di importo inferiore ad Euro 600,00: spedizione in porto franco con addebito in fattura di Euro 10,00;
- ordini singoli (non cumulabili) di importo inferiore ad Euro 100,00: spedizione in porto franco con addebito in fattura di Euro 10,00 + addebito di € 10 per oneri gestionali.

Riepilogando:

Valore ordine	Trasporto / Addebito	Oneri gestionali
Maggiore di Euro 600,00	Porto Franco	-
Minore di Euro 600,00	Euro 10,00	-
Minore di Euro 100,00	Euro 10,00	Euro 10,00

1. ORDERS: when an order is placed, all conditions are automatically accepted by the client. The order is irrevocable but we reserve the right to accept it. All orders should specify the items numbers.
2. PRICES: all prices are ex works (packing, VAT and freight excluded).
3. PACKAGING: is free, a part of special requirements extra charged.
4. SHIPMENT: It can be CIF with invoice charge, by parcel post or with a forwarding agent suggested by the customer.
5. DELIVERY TIME: is purely indicative.
6. CLAIMS: They should be notified within 8 days from the date of goods receipt. We shall only arrange free replacement of the tools acknowledged as defective ones by us. In case of dispute, the Civil Court of LECCO will be competent.
7. GOODS RETURNED: Any goods return should be authorized by us.
8. PAYMENTS: to be made directly to our head office. In case of late payment, we charge the bank interest rate, including additional expenses.
9. PRODUCTS CARACTERISTICS: The images of this catalogue are purely indicatives, we reserve the right to make modifications without any notice.

THE REPRODUCTION OF THIS CATALOGUE IS PROHIBITED.

Any clause contained into your order sheets which is in contrast with the above mentioned conditions it is not valid.

1. COMMANDES: Chaque commande envoyée accepte automatiquement nos conditions de vente. Les commandes sont irrévocables mais nous nous réservons le droit de les accepter. Dans les commandes signalez les codes des références.
2. PRIX: Les prix sont pour marchandise franco départ (emballage, VAT et transport exclus).
3. EMBALLAGE: gratuit, sauf spécifique demande du client et qui sera chargée sur la facture.
4. EXPEDITION: CIF avec charge sur facture, par plis postal ou par le transporteur du client.
5. DELAI DE LIVRAISON: Le délai est seulement indicatif.
6. RECLAMATIONS: Ils doivent être notifiés par écrit dans 8 jours de la date de réception de la marchandise. Ils seront pris en considération si les outils seront reconnues pour nous défectueux. Le Tribunal de LECCO sera compétent en cas de n'importe quelle contestation.
7. MERCHANDISE RENDUE: Chaque envoi doit être autorisé par nous.
8. PAIEMENTS: devront parvenir exclusivement à notre siège en respect des accords pris. En cas de
retards nous débiterons les intérêts de banque et tous les frais accessoires.
9. CARACTERISTIQUES DES PRODUITS: Les images contenues dans ce catalogue là sont indicatives. Notre société se réserve le droit d'apporter des modifications aux produits sans aucune notification.

LA REPRODUCTION DE CE CATALOGUE C'EST INTERDIT.
